Suggest remedial measures as well

3. Conclusion

The Essay

Kofi Annan, in his speech at UN General Assembly in 2005, said, "The brain is a major challenge for many developing countries. We need to create opportunities for young people to stay and contribute to their country's development." Brain drain phenomenon has become stark reality with millions of skilled workers leaving their home countries in search of better opportunities. As the world grapples with challenges of globalization, a silent crisis in developing countries cause a huge brain drain. There are several causes related to economic disparities, educational opportunities, political instability, globalization, social and cultural factors that consequently effect country's socio-economic situation, research, political environment and healthcare sector. It hinders the progress of the country leaving behind a trail depleted talent and lost potential. Therefore, this essay discusses the causes and consequences of brain drain.
