

3/5

Essay: Artificial Intelligence can be the saviors of human race.

OUTLINE:

1- Introduction

Thesis statement: Artificial Intelligence is a tool that has the potential to alter humans' fate. Therefore, it can be the saviors of human race. In the current dynamic world of innovations, it is of great service to mankind.

2- Artificial Intelligence: Two sides of the same coin.

3- AI as a preserver of human race. (Thesis)

a- AI medical equipments diminish mortality rates, among humans.

b- Early prediction of disaster saves lives and infrastructure.

c- AI sensors counter climate change.

d- Value alignment of AI software to ensure security.

e- Driving force behind innovations, aimed at resolving major challenges. e.g; self driving cars.

4- AI as a trojan horse to mankind. (Anti-Thesis)

- a- Exposure to lethal radiations from equipments proves detrimental to health.
- b- Disasters are often the consequence of AI weapons proliferation.
- c- Training AI models pollutes environment via carbon emissions.
- d- All AI tools ~~are~~ do not work according to alignment principle. e.g; self-driving cars.
- e- Alongside resolving challenges, AI innovations are unsafe in nature.

5- Apart a destroyer, AI is a potential savior to human race. (Synthesis)

- a- AI based radiations only target infected area for limited duration.
- b- Responsible use of AI weapons saves human race from threats.
- c- AI models are not only and solely responsible for environment pollution.
- d- Except few cases, AI tools ^{are} basically value-aligned. e.g; stop-button problem of AGI systems.
- e- AI unsafety is mainly uses-purposive.

6- Conclusion
