

Paragraph Writing Practice.

The Impact Of Artificial Intelligence on Job Markets

1. Topic Sentence:

The Artificial Intelligence will impact the jobs in both ways i.e. it will replace some jobs but it will also create jobs in the new fields.

2. Explanatory or Reasoning Sentence:

The Artificial Intelligence is often viewed as a means that will substitute humans in their roles and will get rid of the many job opportunities. On the other hand, proper awareness and education can make people aware of the new jobs and trends it will bring along with it.

3. Supporting Point (1):

The AI will replace humans in the customer service, executive assistant, and administrative jobs, graphic designing, data entry roles, transcription services and market research analysts.

4. Example (1):

According to the **World Economic Forum's Future of Job Report-2020**, an estimated **85 million jobs** are predicted to be impacted by AI.

5. Supporting Point (2):

On the other hand, AI will set new trends and will develop new markets and jobs for people.

6. Example (2):

It will create the roles of AI research scientists, prompt engineer, deep learning engineer, AI chatbot developer, AI ethics and AI bias analyst and the list goes on.

7. Concluding Sentence:

Artificial Intelligence will setup a new world where traditional roles ~~are~~ ^{will be} replaced and new trends will be established.
