

# Climate Change Awareness: More Important than Climate En Actions

## 1- Introduction.

Thesis Statement: The world needs climate change awareness directly, moving one step above climate actions. Stringent action plans have failed to deliver the desired result. So, widespread awareness about is more important than mere actions to effectively mitigate the climate change.

## 2- Climate Actions and Climate Change Awareness.

3- Awareness is more important than climate change actions.

a- World is continuously lagging behind in meeting actions.

b- Climate change is exacerbating rather than being mitigated by actions.

c- General public is not realising the gravity of situation.

d- Ideology can better guide actions.

4- Climate Actions are more effective than Climate Change Awareness.

a- Annual reviews of actions show slow but steady change.

b- Honest evaluation of missing out of targets impose greater responsibility.

c- Climate actions are inclusive of multi-corporal pledges to mitigate <sup>climate change</sup>.

d- Actions are structural elements that <sup>are</sup> ~~can be~~ measurable for evaluation.

5- Awareness about climate change is crucial than introducing action plans.

a- Awareness can produce mass voluntary change to mitigate the menace.

b- Missing out of ~~el~~ targets <sup>direct</sup> ~~questions~~ change of approach.

c- Divided responsibility will yield better results in curbing the change.

d- Actions always follow reason.

6- Conclusion:-
