

be possible through Artificial Intelligence

6. Conclusion

Can AI give more disadvantages to human than Advantages?

1. Introduction

Artificial Intelligence gives man both advantages and disadvantages. But the benefits of Artificial Intelligence are much more than its demerits. Because it makes the life of human more easy and reliable.

2. Analyzing the concept of Artificial Intelligence

3. Artificial Intelligence gives more advantages than disadvantages.

- a) More work can be done by machines than human.
- b) Artificial Intelligence gives job opportunities to human.
- c) Health sector improves by the use of Artificial Intelligence.

d) Artificial Intelligence ensures security of human.

e) Education level reaches at high level by using Artificial Intelligence.

4. Artificial Intelligence is more harmful for human.

a) The efficiency of human to do work decreases because of Artificial Intelligence.

b) Artificial Intelligence replaces human at work places.

c) Disease are increasing because of dependency on Artificial Intelligence.

d) Privacy and security threats increases because of latest technology

e) Student's critical thinking ability reduces because of A.I.

5. Artificial Intelligence proves as savior for mankind

a) Machines gives more efficient work done than human.

b) Using A.I tools in effective way, increases job for unemployed.

c) Latest Technology ensures to cure every disease immediately.

d) Human security is not only affected by A.I but because of its negative uses.

e) A.I helps to meet the educational needs of globe.

6. Conclusion.
