Essay:-

Higher Education:

Introduction:-

Higher education is the key to new worlds. In past decades, college education was seen as a privilege which few had access to. Nowadays, it has become a culminating stage in people's life. Higher education has proved that it has a monetary value, as the salary of a person with a ~~big~~ college education is higher than that of a person with a high school education. Some people have sold the idea that a higher education is a waste of time and money, and that such education should only be offered to a limited group of people. However, what makes these people believe they have the power to decide what others should do or not do with their lives? In my opinion, everyone should pursue a higher education because it would help to reduce monopolization of wealth and power, it would allow people believe to

exercise their freedom and
create more opportunities in their
live.

Monopolization of wealth and power
could be reduced by higher education.
As long as the wealthy and powerful
people keep the knowledge from
those who are hungry of it, the
economy will remain the same.

As Linda Lee recalls from Caroline
Bird:

"College doesn't make people
intelligent, ambitious, happy, liberal
or quick to learn new things.

It's the other way around. Intelligent,
----- people are attracted to college in
the ~~other way around~~ first place"
(871).
