

Date: _____

The environment has gone beyond the tipping point now.

Outline :

1) Introduction

Globally, the environmental degradation has exceeded beyond the tipping point. The lack of seriousness by global communities and factors leading to climate change have exacerbated the environmental degradation. However, by applying strict preventive measures ~~the~~ ~~degradation~~ the environment can be restored.

2) How environment has gone beyond the tipping point now.

3) The factors which lead to rapid environmental degradation

a) Climate change

b) High concentration of GHGs in atmosphere

c) Massive deforestation

d) Rapid Urbanization

e) More reliance on fossil fuels

f) Population explosion

g) Lack of seriousness by global community

Date: _____

4) Impacts of rapid environment degradation

- a) Rise in global warming
- b) Increased rate of natural disasters
- c) Deterioration of ecosystems
- d) Rising sea levels
- e) Food insecurity
- f) Extreme weather events

5) Ways to restore the environment

- a) Spread awareness about environmental and its importance
- b) Use of alternate energy resources
- c) Afforestation or Reforestation
- d) Promote sustainable development and transportation

6) Conclusion

• Unethical use of AI tools in education and its consequences.

Outline:

01- Introduction

Globally, the AI tools are being used unethically in the education which has serious consequences. These practices have diminished learning outcomes and raised the concerns of data authenticity. However, by applying stern measures these problems can be restored.

02- Why AI tools are used unethically in education and its consequences

03- How AI tools are unethically used in education

- a) More reliance on AI generated content
- b) Lack of transparency
- c) Exploitation of vulnerable learners
- d) Commercialization and Profit motives
- e) Biased grading by some AI tools
- f) Unauthentic data generation

04- The consequences of unethical use of AI tools in education

- a) Lack of intellectual abilities
- b) Increase in educational malpractices
- c) Rise in privacy concerns

Date: _____

- d) The potential for AI to replace human teachers
 - e) Neglect of critical thinking
 - f) Loss of autonomy and control
- 05- Ways to reduce the unethical use of AI tools in education

- a) Development of ethical frameworks and guidelines
- b) Promotion of transparency and explainability
- c) Bias detection and mitigation
- d) Regulation and oversight of AI tools in education

06- Conclusion
