

Islam gives special importance to education. As Islam is the only religion that is embodiment of knowledge and spirit, According to Islam, the character building of an individual is not possible by separating the spiritual from the mundane. As politics cannot be separated from religion, in this way, education is part of religion. At the time of creation of Adam, Allah Almighty had granted human the wealth of knowledge of things. On account of it. Adam got supremacy over the angels and became the crown of creation. The first revelation to the Holy Prophet (P.B.U.H) impresses upon the importance about the sources of knowledge. The Allah Almighty says: "Read in the name of your Lord Who created man by clot of blood. Recite and your Lord is the most generous. Who taught by the pen."
