		1 2 3 4 3

country of Pakistan is at the forefron of myriad internal and external challenges. Among these challenges, the economic country has been a consistent headline of the newspapers This crunch is not an absurpt happening, it's roots dates back to the inception of the country in ordix to get some relief, the country has always Kpacked the doors of multilateral tender Among them, IMF shares a long. history of Bailouts given by the ofund to Pakistan. However, the situation has never improved by deepning the country's dipendent on foreign toam and its economic tumult. This situations requires of new policy approach to end this quagmire Althoug Because, Listory has proved that although IMF bailouts have quaranteed short-term temestes, in the long Tur, they have exacerbated the dependency of the country on foreign loans Hence, the country Los never come out of balance of payment crisis and fiscal deficit problem ocspite implementing the maxis condinalities Before discussion on the topic, It is imperative to unearly the purpose behind establi lishment of IMF (International Monetary Fund) when the world lift was facing the economic implications of WWI (world wax II) a meeting at Bretton woods was arranged by the US, along with Eurapean countries by the end of that meeting two ideas came on to the fore: The world

	DATE://	
	Bank and International Monetary Ful.	
	* Since, entapean countries were coming from	
one c	the deadliest wase in Listory; they were in	1
	need of immediate economic anistance to	
	rebuild and reconstruct their destabilised economies.	
	Resultantly the aforementioned instituitions got	
	their birth to help shose countries in building	
	back their stippled economies and demolished	
	infrastructure.	
	PISIAMIC REPUBLIC of Dovistan came into	•
	being in one of the unfortunate economic.	
	socio-economic conditions During the early days,	
	the country did not even have the necessary	
	Stationary to manage the administration of	
	the country at its naccent stage. Therefore,	
	the country got first bailout prixage from	
	IMF in 1958, after its pining the multiplateral	
	lender in 1950 Since then, the country has been	
	one of the loyal customers of IMF to enuse	State of

	The unending empanic and a	
	Country after collaborating with 1MF warrants	TO THE

an investigation into the dark-oside of this bailout program, perhaps by keeping le country in the unending tail of foreign loans. IMF bailouts focuses on short term financial stability, in the first place. Ever Since, Pakistan Las taken IMFIS coan, W Las felt Short-term jolls of ground thrower, in the long-term, the country has failed to keep the ball in its Land This is because, IMF LOAN comes with certain condition. The country gets the loan amount in arrest This is done so, to emuse that every that country which is taking 11-17 loan is It implementing the conditions of multilateral institution as will. Thus, the country is niver able to planufacture the long-term horizon in the future. For instance, during the second last EEF (Extended Economic Facility), the country had a positive trajectory funtil 2022 However, after that the its GDP growth toucked the depth with 0.3 percent growth as compared to b percent growth in 2022. This is just one engaple, Repeatedly, the country has been able to servert se short-term financial intubility, Hence, the courtry has to keep Helf estact with . IMF to keep the ball volling. Unfortunately, IMF devised economic policies have long-town consequences for the general. Public. This time too, business are winding up their Businenes, Moremplayment level is increasing Islain Drain is lampant. As per the report by world Bank in 2022, HDI

	DATE://

developmental programs All of this is Lapp. ening thanks to the policy recommendations given by INF. As discurred above, IMF and its loan packages never come without conditions For instance, during the working on the consigning of the current SBA, IMF presented tough conditions for the country Despite the fact 0. -But Pakistan was struggling due to covid-19 and the Lorrendons floods of 2012 MF, once again, offered it's rigid measure. Hask the country to cut off the fuel subsidies. Herce, the country is facing sky-vocketing petiol and diesel prices, and electricity le. second, It asked the country to emuse austerity measures and levy further taxes on the poor. CHIZERRY of PAKISTAN RESultantly, the country is facing worst inflations throughout its history, standing over as percent. For the last almost two years Not only this, the country Las Dut cuils on imports in place Resultantly, business activities Axe at Sub-pay for quite some time. with all Hese restrictions, the country has to request friendly countries to for further loans to pay the interest due on other loam, as inflation never tramlates into economic growth, Hence the spixal of spixal loop of loan never end. Countries, Especially paxistan, the loan to ensure factions sustainability. Undoubtedly, the country will have to fulfil the lender's Conditionalities. Ho wever, IMF is not an ordinary

	Survey of Pakistan, the country 2nd losses

accumulating to 8 \$ 30 billion thou threndveds of families had lost their homes and were on street. Despite these facts, IMF, since again offered loan with hard condition. The country had no other thoice, but to sign this costly agreement Resultantly, the country's economic indicators, including interest rate, inflation are toucking the slig, having causcading effect on the Society Trun, ligidness in policy are costing the economy of pakistan. HOWENEY, despite these realities, other School of thought advocates IMF bailouts as a promising feature towards sustainable way forward It is argued that time and again IMF bailouts have avoided the immigent default of countries, especially pakistan. It is true, that in 2023, Dekistan was at the verge of default. Howeve At that time, none other Lelped pakistan Even friendly countries and brotherly nation replied disappointed pakistan. Finally, 119 came into the scene and offered the country much needed telier However, despite the Lelping Land of IMF, it is overlooked that the country was required foreign kelp due to detAexisyste its deteriorated economic conditions. Thur, was it rationale to demand that pakisten would take back of the supe subsidies given to the poris, AND and would integers levy further taxes Hence, the country faced lockdowns and demonstrations throughout the

	country Levefore, instead of making bad situation
	worst, the nich institution could have offered
	better condition. This has not tappened for once,
	INF follows a constant policy for everyone, forgetting
	one's economic woe
	It is also argued that, no doubt, Into
	bailouts come with strict conditions.
	These conditions are sort of onslaught on
	the society Honevex, IMF wants to bring
	Change CHANGE LAYOUGH STRUCTURAL reforms
,	to help the country by standing on its
	fast. It is a positive side of the coin that MYE,
	apart from giving loan, gives the policy advice
	to enucle that in future such happenings de not
	Lapper However, here policies with their positive
	implications are always for short-text. In the
	long-un, the country has to, once again, knock
	the door of long for bailout my never
	curtomise its policies as per the realities
	of each member country to follows have
	memules: Austerity mensiones trade liberalisation
	and reduction in subsidies. But for longe term
	gain these conditions should be tailored to every
	country and its needs Thun, countries, like paristan,
	are in the contant financial and Economic
	pain, due to 1197 & bailoute! conditions.
	Moreover, It is said that structural
	reforms devised by IMF will put the
	country on the track of sustainability.
	The country will experience upward spiral growth.
	The reform of IMF, including leving further taxa,

privatisation of state-owned enterprises and taking back subsidies, along with devaunation of currence However, it is true to some extent that such reforms will enable the country to pay back INFH seems the such policy recommendation are given to KEEP Pakistan in a vicious chele of debt and dependency on INV. History is wident. that despite taking on loans over 20 times the country & Las not experienced sustainability in & its economic growth. Reasons we apparent. Among them, is leving taxen taxes are regressive in nation. These taxes cripple the life of salerie clan as well as middle level businene taxes, through indirect mean, offects businenes They are unable to import. When imports are scarce, economic productivity awindles. Hence, demand of Surparses supplies. Resultantly the country has to confront inflationary situations, as it is confronting in the moment on the basis of above discussion, it is apparent that the country requires new thinking to circumvent this vicious CYCK of INIFIS bailoux. First of all, the country must emuse that this time It will know Intils door for once and I have time of course, co pakistan requises mustance in the current lituation. However, It must emnre that bailout would given with better conditions The country needs to present

	its ease by giving all the evidence, that
	the country can never be stable, if condi-
	tion like these prevail. Thus, the country
	would be able to relocate the money
	for the good of the marko. Otherwise the pakistan
	would be stuck in the well of bailouts
	if it is fails to pursuade 11.
	lack of political will and fuedal
	lords of this country has forbad the country
	to go for structural reforms the country,
	Since 2009, lax-to-GIDP ratio has been at
	91/2 While that of DECD (Difinisation of Economic
	Cooperation and Development) Countaries ratio
	Low been at 31 percent, ching 21 percent as
	PEI The report accounted by world Bins
	Hence, the country needs to emuse minimum yation
	of 15%. Given that his wackieved wrongs
	progrenive taxation by they leving taxes on
	the teal estate sectors, the agricultural cocton
	and the relail sector, Moreover, the country nech
	to digitalise the tax a machinery the annexture.
	reacted porta of kevenue is esten in positive
	interior herefore, the poraming govern
	infaired sixes tetalms, laxing the country

	No The of Chiller debt of Enough sector Hence
	of eming structural veforms in true some us
	able to get vid . 6) 120
	forefri which.
	It is also encouraging that the country
	is working on a promising idea of site. Before text,

	busines kurdles would, always, more the	
	confidence of foreign investors. Countiles	
\parallel	like Bangladesh and India are following	
\parallel	the concept of one-window operation.	
	Gence if properly followed the country would	
	be able to attract investment into the agrical	uxal,
	and mineral sectors. The immediate requirement	
	is the shart the upcoming government, along with	
	military, properly implements this idea. Resultantly	1,
	The country would be able to entract the	
	patential benefite in the form of economic	
	productivity, expression operation, employment	
	and, in fun, Economic grave.	
	Lastly, the country most, now, learn tenom from the history. The history of	
	Pakistan is trinted with the entire-comfitu-	
	tional acts of the contribution whitney esta-	
1	blishment has always influenced the judisdiction	
	of politician. The Judiciary Las never been	
	independent. Filedal (ord) have made their own	
	contitutions. Moreover, Corneption has been the

Chairman Mao, leader of Communist Revolution famously said, " women Lold up half the SKy By building upon these words, It is unfortunate that the true work of women has not, yet, been yealised. This discrimination based on gender is not a contemporary indic. Its roots dates back to centuries old norms and traditions with the advancement in Science and Technology, undoubtedly, several reforms move more have been initiated to emure gender equality in all spheres of life, whether be it be in politicis, education workplace or in personal life decisions making Despite these initiatives one way or the other, sense of discrimination prevails, especially in the workplace Although, several reforms have mitigated gender inequality, gende based discrimination in the form of wage gap, ratio of male to female employees and lack of special facilities for mothers shows a stark situation of gender discrimination in the workplace. Before discussion on the prevalence of discrimination loased on gender It is mandetoxy to unearth the historical roots of gender inequal aling A In the dark days of Lumanity before enlightenment eva in 16th century women were facing Larsh living conditions. They would be considered a person who had no authority to make decisions for her personal life. Accor ding to the tradition in Roman law, women would never be asked their consult to marry a particular person or not The elder of Lev

Į,	nouse, whether her father or her brother, would =
	noxy Levi if they were agreed That was a
3	ituation, which some of the religions have -
	ever permitted.
	HOWEVEY, with the inception of Indies-
1	trial Revolution, in the late 18th century,
	people got to know the potential worth -
C	of women in different epheres of life, people
	not Educated. Resultantly, a in the 19th century
	centuay, Sufforage Movement gained the
,	right for women to cast vote in United
	States. This movement, led to prefurtle movements
	calling for the rights of women. The inception
	of Internet and Social Media has played
	a vital -101e in ensuring and propagating
	the campaigns for gender equality. Due to
	these campaigns developed would have given most
	of the rights to the worden Hower, the developing
	would is yet struggling to emicie equality of
	genders in all spheres of life, patriorchal mindset
	is still prevalent in also shat part of the world, by
	Preventing girls to educate themselves and tomake
	decisions for their lives and professional screens.
	Based on the above discussion, It is evident
	that disparity is the gender, still previl. This
	warrants an immediate investigation to explore
	different facets of gender discrimination in
11	the workplace.
	The first major gender discrimination
	in the workplace is at the wage-gap between
	male and female employee. Both the gender,

	despite equal logskill set and expertise are
	treated difference and analise to a report of
	treated differently According to a report, published
	by world Bank & reads that women get
	0.32 cents in composition to I dollar get by
	A Heir male courtexports. That report further
	Les that due to this discrimination the world
	is losing some trillian, which is mandatory for
	economic grown, the situation in developing country
	like pakistan is disappointing According to 1
	report by Labour Force survey 2020-21, 79
	percent of women engineers are unempland."
	BLAS This means that gender based discrimination
	is rampart through point the world, leading to
	economic losses to in the whole world
	It is the Role responsibility of organisations
	to emide projection of women, which who are
	always videnzable to harrasiment in the work-
	places. Despite legislations and International
	Charters as given by United Nations Hyman Rights
	Charter, the cones regarding gender based harries
	mint our increasing day by day. In pakistan,
	the President Arif Alvi Las dimissed DG
	PAMRA Admire and HR, Haji Adam, due to
	allegations of harranment pagainst his subordinate
	co-worker this is just one example of harranment
	Which is reported, one might conceive that
-	how many on the national and International
	levels, & Ruch cases go unpoticed Thun, despite
	legislations, organizations are failing to
J.	enure gender equality by providing all port
	of protections to every person, interpretive of the
	gender.

	DATE://
	Furthermore, and leave policy, which every
	organisation should offer to its every employee
	is not given to those women who are pregnant.
	This situation is prevalent in developing countries
	especially. Due to lack of such policies, most of
	the women either quit the job or they feeling
	diskerated, stop applying for jobs elsewhere. Also,
	organisations lack child care facilities for mothers
	Day case facility takes case of A milk drinking
	Child, while her mother is at work. These facilities
,	which are given "top organisations, are absent
9	in middle to lower organisations It is inherent
	right of every employee that they should be
	given all the required facilities to serve the
	organisation in the best possible manner. Thus, until
	and unlew women are given their due rights,
	organizations to will not have more options to
	Live the best conclidates for organisations.
	workplace does not only mean that
	limited to administrial provident is extended
	to afferent protenions encompaning apprets
	and politice. It is encouraging that women now
	take active part in sports, especially in developed
	countries due to every horizon developing
	countries due to stereotypical norms women are
	11 Carling to 1
	actively part of the form of the contract of the se who are
	leader lip tole women we always suggested to
•	the administrial toles this county's suggested to
	Enke administrial toles This perception is still will
	sprend that women can not tackle the premise of

lendership roles. However, as per the report EXY by world Bank, over the past so years ployer Digination for Economic Cooperation and gnant. Development (OECD), they have experienced nitries, So percent more growth due to the empower ment fromen to take leadership votes and eling contribute to the economic grown. Thun, Also, countries need to educate themselves and offer yers leadership positions as per the merit irrespective ring of gende 1144 Moreover, It is quite infortunate that fence a countries have made women as prime nt Minister and precident USA has never have a women to be the president of the lading country advocating human right. Similarly atil women in offer countries are not always Prioritised. In contradiction, women have always performed well in leading votes either it be in politics and in other voles. Sheigh Harreng, the prime Minister of Bangkade & Similarly the late Benaziv Blutto, a chorismetic leader. They have proved their mette, and have defied all the stereotypical odds. The chief Executive officer of Kashaf foundation, a foundation which is working for the momen empowerment is also a female she to doing a worderful jab However, these are \$ a few examples a in his huge world in most of the cases, women are not allowed to be the leader of organisation or of a country, which shows high percentage of disposity in gender. In addition, It is also infortunate fact

	The ligher the hances of getting qualified	
	cardidate	
	Moreover, some may say that as in	
	comparison to the gone time, todayla women	
	are empowered and not hat a significant	
	Problem Because, people are getting anaveness	
	and organizations are working towards women	
	emporevement and englat treatment of employees	
	in the WOYKPlace Honever, as per the report by	
	world Bank, the total contribution of women politicians	
	throughout the world national anemblies of at es per-	
	cent in 2021 which was 11.3 percent in 1915. It is	
	undoubteily, a good progress to some extant. However	
	It is not a complete success. Desparities Atill exist.	
	Even if employees, female, are given a chance, they	
	are not given the required level of wase which	
	they deserve. Thus, the world needs to work	
	for the empowerment of women and ofor	
	the auxieness of orfanisations regarding the	
	potential benefits list la	
	potential benefits that they will have after	
	giving opportunities to deserving women emp-	
-	Also, It is deliberated that women should	
	cater to the needs of the children by looking	
	after the bounded. This belief is prevaled in	
	the extremist and traditional families. Such	TO SE
	families believe that male should work outside	-

·	DATE://	
	the house, while female should lookafter	
	He house and do child rearing. However, If	
	this is a problem in today's world, where	-
	instation is skyrocketing It is 100 difficult	
	for the male to offer good care to	
	the Children and his wife. Thus, this belief	
	should be put wide. Women spould go to work for	•
workplace	He to earn and invert in the good education and	
	Lealth of Lev Chiloteen. Undoubtedly, religious	
	obligations are also there for this purpose	
	Difanisations should establish separate work	
-	pince to cuter for the needs of women.	
	This is because, goder equality brings new	Thirty .
	ideas and enhanced level of productivity to the	
	oganisation.	
	Gender discrimination and its	
	negative congequences can not be overlooked	
	Therefore, a in order to a parity in the workplace,	
	a new thinking and policy should be made	
	available.	
	First of all, there is a need of interna-	
	tional convention, like world Economic Forum, to	
	hold conventions every where year The purpose of	
	that convention would be to highlight the gender	
	inequality in all spheres and subjects of every	
	country, especially developing - country. This is because	
	Education and auxeness is of vites importance to	
	change the old times thinking. Futtermore,	
	-HAS that convention would hald discussions among	
	the & CEOs of different multinational corporat	
1.	times to accertain and let the rest of the world	

Know the aspiration and requirement of Ruch organisation. Also, the convention would HE make it binding on & the organizations to enure certain percentage of females employees, say 40 pl. Thus, such conventions would be prixament to the propagate the auriveren and reduce gender discrimination in the workplace. On the national level legislations should be made to emure that every organisation provide the minimum unge to every female employee. It should also ensure that organizations offer, leave encashment of female employees Living their child lotter Especially, in developing countries, apart from Jegislations, commissions should be made to Kill Chick and Balance on all institutions. This will envive that made legislation must Mouch and feminist movements sking Lout the world is a step in positive direction However, such initiatives should talk of the real insides, including gender discrimination in workplace, comtraints on female education etc. Resultantly slowly and gradually mind sets would change, and somen and gives would get their due vight. lastly, there is a dire need of new curriculum. Firstning is paramount in the early or rudimentary stage Thur, new curriculum should be made. If not a complete overhand of the Corriculum new chapters should be included Which would shed light on gender equality
