Title :

“Educational Intentions In Society With Its Freedom”

Indent the paragraph

Freedom of education has different scenarios as children, according to some educators, must be under various perceptions which decide the moral values of being good and bad. For some educators, liberty ensures moral perfection and it is a source of development rather than positive purpose. The writer negates this idea as it is necessary for a community to get development due to cooperation caused by education. For those who are in favour of freedom of education are those individuals who consider education a criteria of success because in social context education is more important as it is an opportunity of growth and rationality in society.

Punctuation needs improvement

Paragraph:

A Critical Analysis of Education System In Pakistan.

Education is the most basic right of a person. If he fails to acquire this right than he is far away from himself and of this universe as well. Unfortunately, education in Pakistan is not on its track because of some grave issues since the existence of Pakistan. Within the passage of time the education system has got many accomplishments but still it has many pitfalls which are needed to bring to the table critically and to resolve them for betterment of the

education system and the country. First and foremost critically analyzed concern is the disparity in Pakistani education sector. The provincial classification of educational institutes for example, public, private and madrissas is the biggest hindrance in uniforming our education system. In addition to analyze more critically the highlighted point is the syllabus and curriculum vacuation which further causes the ethnicity in the country. Moreover, the biggest fault of education system is low GDP share and the promotion of education as profession instead of enlightening the students with skills. Both teachers and parents are suffering from this thing. There is a dire need to abolish all these pitfalls to strengthen the unity in education system to end the threats and to promote positive aspects in the state.
