Climate change awareness: more imp than climate ^{actions}
Looking at the hostilities of climate change and witnessing
the casualties it is bringing ~~about~~ ensures that
every one is aware of it. Everyone is aware
of the fact that climate is changing with unprecedented
rate. The need of the hour is ~~to~~ to convince/
propel the world to take actions to counter this
impending crisis.

Thesis Statement

Acknowledging the unprecedented rate of climate
transformation is the initial step, but the need
of the hour is to mobilize our global profile,
urging them to take actions to counter this
impending crisis. The harmony of awareness
and action must be struck to forge
a sustainable future for our planet.

3- Awareness about Climate change, how fast it is changing and influencing people's life

a) The Escalation of global temperature

b) Surge in the frequency of extreme weather events
Nature's tempests are not longer occasional, Their increasing frequency paints a canvas of unpredictability, disrupting lives and habitats.

c) Disparities in climate impact, regional inequality
Climate change's toll is not uniform, it exacerbates existing inequalities, disproportionately affecting vulnerable regions and communities.

d) Retreat of glaciers and the melting symphony of our ice shores. — The majestic glaciers, guardians of time, ~~are~~ are now receding at an alarming rate, mirroring the diminishing resilience of our frozen landscape.

e) Ocean acidification, nature's silent symphony
Beneath the serene waves, Nature's a silent crisis unfolds as oceans acidify, imperiling marine ecosystem and disrupting the delicate balance of underwater life.

f) Influence on sea levels and coastal regions

As climate shifts, the rising tides become silent intruder, encroaching upon coastal realms and redefining the very geography of our shores.

g) Climate change results conflict crisis

How climate change helps violent non-state actors to exploit affected people, due to state's inefficiency to combat climate loss.

4- The necessity for immediate and impactful climate actions is paramount

a) Embracing renewable energy

Transitioning to renewable energy heralds an era where the sun and wind become the architects of sustainable future.

b) Afforestation and Forest Conservation.

c) Promoting eco-friendly transportation

d) Empowering youth for environmental advocacy

e) Facilitating eco-friendly waste management

f) Advocate for climate resilient agriculture policies

g) Fostering resilient urban planning

h) Encouraging sustainable tourism practices.

5- Awareness Demanding Collective Efforts

a) Worldwide alliance for climate mitigation

b) Unified global commitment for carbon neutrality

c) International synergy for renewable energy adv

d) Worldwide partnership for reforestation initiative

e) Cross-border collaboration for a greener tomorrow

f) Unified front for ocean conservation

g) Global Consortium for climate education

h) Worldwide solidarity in environment conservation

6) Conclusion

In a nutshell, the imperative to address climate change is not merely a awareness about climate change and how it is affecting people but it also summons to collective consciousness and shared responsibility. Acknowledging the urgency of climate change is the catalyst for transformative action. As we confront the hostilities of a climate change, let us remember our choices, like note in a melody, contribute to the global harmony of resilience. The journey towards a sustainable future is a shared commitment, echoing Jane Goodall's wisdom

"What you do makes a difference"

In this symphony, each action, no matter how small, plays a crucial role in shaping a planet, where nature's equilibrium is preserved for generations to come.
