

Topic:

Artificial Intelligence Can be Savior of human race

OUTLINE

1 Introduction

Thesis Statements

In modern era, the development in artificial intelligence brought many benefits for human being. On the other hand, critiques argue that along with its advantages posed multiple threats to human race. However, ethical use of artificial intelligence in various fields minimize these threats.

2 Conch paragraph

3 How artificial intelligence can be savior of human race?

- a) Promotion of technical education by artificial intelligence
- b) Incorporation of AI in health sectors show significant results.
- c) Artificial Intelligence driven transport reduce accidents.

- d) Economic growth can be enhanced by artificial intelligence
- e) National security system is more secured by AI.
- f) Artificial intelligence helps in making rational decisions.
- g) Human error is minimized by AI.

4 Threats posed by Artificial Intelligence to human beings

- a) Huge loss of job of automation
- b) Chances of warfare increased by development of AI weapons
- c) Lack of emotions and creativity in decisions
- d) Ethical issues raised due to AI technology
- e) Disinformation and misinformation fuelled by AI

5 Recommendations to mitigate the threats of Artificial Intelligence

- a) Develop legal regulations for artificial usage.
- b) Create organizational AI standards
- c) Guide technology with humanities perspectives
- d) Public awareness about AI technology.

6 Conclusion
