How Terrorism and it's perception Shapes by the Mass Media?

Outline

1. Introduction

   Mass media plays a significant role in shapping the perception of terrorist and terrorism. It possess a huge impact on peoples thought which leads to potrayal in shapping and reshapping the image of terrorism.

2. Tree of Mass media
   (a) Point media [Newspaper, Magazines]
   (b) Broadcast Media [Television + Radio]
   (C) Digital Media [Internet, Social media]

3. How terrorism and it's perception shaped by the Mass media?
   (a) Influencing the public openion
   (b) Social Engineering
   (C) Increase the efficiency of terrorist outfit
   (d) Potrayal of terrorist groups as Hero/ Villain
   (e) Potrayal muslims as terrorists { 9/11 Iraq invasion } & [Palestine issue].
   (f) Promting western idea and culture Hijjab Bane in France 2011

4. Consequences of the perception created by media.
   (a) Increase in extremist tendencies
   (b) Rise in voilance
   (c) Rise in terrorist groups
   (d) Creating fear and Anxiety
   (e) Psychological impacts
      · Missleading Youth
      Country image
5. Actions taken by concerning authorities
   (a) Restriction on content
   (b) Reform in policies
   (c) Filtering the Data
6. Remedial measures to counter negative impacts.
   (a) Reshapping the policies
   (b) Bann on voilance content
   (c) Using AI to remove the objectionable content
   (d) Set Ethical measures
   (e) Public Awarness
   (f) International Compaigns
7. Conclusion.

Mass media is a core factor which shapes or reshape the image of any thing. Now a days a most important issue terrorism is also got benifit from it. It gave the necessary fotye to the incident which fulfills the aims of terrorist groups. In past when there was no strong mass media the terrorist activities and their fear was low as compare to the the current situation. The consequences apeers in form of psychological disturbance and fear in people. The extensive media coverage of every terrorist activity is displayed on media platform which leaves its marks on society and its image on international level. These should be urgently taken remedial measures which can lower the negative impacts of social media and print media activities. Those measures shouldnt be on countries internal surface but also on international level so on broader level this evil can be treated. These will be

hurdles in that way but targetting the every aspect from internaly and externelly can be (go) hit a great impact which is a dire need of the current situation.

Before discussing the terrorist and their perception it is necessary to understand how and which media plays it's role in this evil. There are three types of mass media. One is point media in which newspaper and magazines are at front which gave to the nation a physical/ hard copy of the terrorist activities and it's negative aftermaths. Which is easily available and under the access of even children. The second one is Broadcast media in which television and radio plays it's role. They gave abrupt and live evidence to the people which some times contain voilant content. It effect the every generation. The third one is Digital media which is the most dangerous and mostly used now a days. Through internet twitter, face book

Youtube , what's app , instagram etc, violent
content not only displayed on it but
also shared to everyone in no time.
Which is a challange for every nation.
.... Now question is how this mass media
is shapping terroris and it's perception
though it's plateforms. The very important
factor is shapping the public openion.
Mass media shaps the public openion
through it's every day debates and
contents. people take their views
and perceptions as their own. They
trust them blindly. They creat such
embigvas masks on views/ listner/writter
which leads them towards negative
perspective. Some tines those news are
totaly different from the states view
or actual incident. But people
trust them blindly. .
Public openions helps in social enjineering
process which is a drastic aspect.
The openion of one gorup penetrates
in another group thoug the mass media.
A perception which is not right in one
area is being in process of right through

this channel. Terrorist used this process and often gave their views and lame excuses through mass media. The recent example of this was the 9/11 attackes which was accepted by Taliban and then gave their side views, to gave it the right stamp.

This over broad-casting of the news and voilent content help in increasing the efficiency of terrorist outfits. According to the UNOCT terrorists are being up-to-date through the extensive coverage of the terrorist incidents.

The mass media plays it role in highlighting these voilant incidents. Even those act replayed again and again on media, which gave them publicity which is a crucial aims of the terrorists. Some times terrorist evaluate their performance and image through mass media which facilitate them in up to date about every aspeet. There is no doubt in this that terrorist shaped their image through mass media.

Similarly, mass media plays a crucial role in portrayal of terrorist groups as a hero or villain. Mostly people only relay on social media they didn't go though from facts and figures. While some people did not have enough knowledge about the background of the issue or the central theme of the issue, they consider terrorist hero or villain whatever total mass media gave them. Uneducated person is more proone to these type of behavior. The US invasion in Iraq on the basis of terrorist activities whole world thought that Iraq must hade those activities. International media potrayed their image as a villain and everyone accepted it while the main story was totally different. As similarly taliban made Osama Bin ladin a hero but whole world knows that he was a terrorist who killed innocent civillians. Which was only possible though mass media.

Mass media also used for potrayal muslims

as a terrorist. There is a lot of channels which work only for destroying the image of muslims. Israel attack on Palestine, US invasion in Iraq and Afghanistan are the main conectors which help the powerful in destroying the image of muslims and postrayed them as terrorist nation. In India hindu activist and extreemist gave tough time to muslims who are live in India. They faced voilance physical and mental both. Recently after the opening of Ram mandir in Ayodhya triggered the hindu extreemist. They starts beating and destroyed the financial resources of the meslims. When these videos viral on social media hindu activist in other States also starts voilance against muslims. The burning of church in Pakistan was also potrayed a negative (impact) image of muslims. Although some of them are true at some extent but mostly are only for propaganda against muslims. After 9/11 incident western media

potrayed muslims image as a terrorist and during those days whole world accepted the vague scinario of upper power.

Along with potraying the image of muslims as a terrorist Mass media also promots such idea and cultures which are totally opposit or against the muslims. The most recent example of this was Bane on Hijjab in France. The french government put a bane on hijjab which was still controversial in western world. The Iranian girl death incident due to hijab issue was also raised by western world so badly, which also effect the muslims image. The western countries want to expand their values and cultur all over the world. For this mission they oftenly highlight muslim countries issue on global level and try to tornish muslims image.

There is no doubt in this, that western countries (trying to) tries to make

their hegemony through mass media.

However, massmedia possess serious consequences like increase in extremist tendencies in people. When broadcasting of the terrorist activities or punishment to them is broadcasting on massmedia then there will be a higher chances to put extremist behavior in people. Some people learn these activities which displayed on media and some who are in favour of them got angry. In both situation people will also want to adopt these activities. The recent example of this scenario is haothi rebels who attacked on UK and US ships in revenge of Palistine and US vetoing on cessefire. These activities brings extreenism or voilence act in a sociefy which is a hallmark to a society.

Massmedia also rise voilance and terrorist group. When voilance acts and extreenism displayed on massnedia vulnerable individuals got inspiration from them. They also want to creat

Same fear and anxiety in their society for creating hagemany or getting desired goals. These acts adopted by the civillians which makes them psychologically ill. The studies showed that people who go through from terrorist news daily there will be a high chances that they will adopt same behaviour when they did not got desire results.

This impact mostly observed in youth as they are more prone to or desirable to those act which are in favour of extreemist. All these factors can tornish the image of a civillized country.

Now it is important to evaluate that what are the action taken by the concerned parties to overcome this issue. When a country feels that people starts getting voilance acts from a perticular media then they starts limiting/ristricting the content of the massmedia. But this effiat does not prove effective as we

Can restrict internation media. As every country has their own rules and values in some countries freedom of speech is very important and in few countries all are in control of government. Both are unable to control extreemist act or voilance. Some of them starts filtring the data as Youtube and instagrame take permission or gave alert when any voilant act is displayed on screen. Some of channels starts mutting the voices and blurred pictures of voilant act. But results are not satisfied.

The situation needs urgent denedial measures as it capped the climax.

There is an urgent need for reshopping the policies on international level. As one sided actions can not be enough for this evil. There is a dire need for urgent policy reforms and involvement of every state. Like meeting and events for economic stability helds everywhere, there should be

high level meetings to counter this issue in which new policies and districtions should be decided according to the areas need. So no one can get negative inspiration from terrorists and terrorist can not get benifit of publicity.

To counter this issue (AI) Artificial intelligence can help every state on better level. As it can filter the negative and sensitive material from massmedia. It can help the human to bring safe and fear free environment for their child. It can protect the youth from getting involved such activities. Voilance act should be banned and AI can help in this matter without any hurdle. But there are some negative impacts of AI which should be kept in mind.

Ethical consideration can also play important role in controlling massmedia from terrorist aims fulfilling. Those ethical consideration should be adopted on

international level. There is a need of international campaign to set these ethical measures and restrictions.

Last but not least public awareness should be held everywhere. There should be seminars and NGOs for spreading the awareness about massmedia's negative impact on people. There should be pre-measures decided to counter this evil. Because if people were aware from this they can counter it in a better way.

In a nutshell, massmedia have no doubt a lot of benifits to mankind but it also provides a way to terrorist in shapping and reshapping their image. They can use this plateform for fulfilling their aims and goals, which can be seen in todays world. Massmedia facilitate terrorists by updating them and throw out their message to others. But all these evil can be eliminate through proper policey reforms and. awerness in people.
