"Poverty is a worst form of violence."
(Nelson Mandela)

Poverty is a global phenomenon. It exists where people are deprived of the means to satisfy their basic needs mandatory to their survival. Mostly the phenomenon occurs in developing countries of the world. Poverty means the deprivation or starvation. Poverty is a condition with many interdependent and closely related dimensions such as lack of employment, lack of education and lack of health, etc. The poverty in Pakistan has increased day by day so, government of Pakistan should make plan for reduce the poverty rate.

Pakistan has faced many problems among poverty is a big problem, few ten years poverty rate of Pakistan has increased quickly so, the government of Pakistan do not control the poverty rate in future, otherwise the poverty in Pakistan at high stages and every people faced poverty in Pakistan very hardly so, government of Pakistan should prepared advance plan for poverty in Pakistan otherwise the poverty rate increased.

In Pakistan, poverty is currently filled with several causes and consequences which need recommendation. These causes and consequences have made poverty in effective to a great extent. However, by applying Itern is a major problem in Pakistan, measures its effectiveness can be restored.

A survey shows that the poverty has increased 30% to 40% in Pakistan during past ten years. It means 40% of population of Pakistan is in poverty.

The solution of these problems faced by government should have been our government in priority list.

The report states 38.8% of Pakistan's population lives in poverty. A majority of the rural population 54.6% lives in acute poverty while this reaction is only 9.4% in urban areas. The multidimensional Poverty Index, which shows a sharp decline with national poverty rates falling from 55% to 39% from 2004 to 2014/2015.

There are several causes of poverty in Pakistan, chief among which is having unemployment. The reason is that, unemployment has caused of poverty in Pakistan which must be considered by the government. The unemployment has increased day by day in Pakistan, because poverty rate at high level in Pakistan. A survey shows that 5.6% of our population is unemployed. This shows that, the unemployment give rise to poverty.

There are several causes of poverty in Pakistan, chief among which is having corruption. The reason is that, corruption has caused of poverty in Pakistan which must be considered by the government. Pakistan is suffering from a fatal problem known as corruption. We need to remove corruption from its root if we want our country to progress. A survey shows that Pakistan has been ranked at 42nd number among the most corrupt nation of the world. In a nutshell, Corruption is a disease spreads rapidly in whole world.

There are several causes of poverty in Pakistan, chief among which is having inflation. The reason is that, inflation has caused of poverty in Pakistan because inflation must be considered by the government. Inflation is a condition, in which people can not afford food, and other things used in daily life. Inflation has increased day by day so, government of Pakistan should make plan for the inflation in Pakistan. A survey shows that, inflation rate in Pakistan has increased 28.5% to 35.5% during past three years. In summation, the government of Pakistan should not control the inflation, otherwise the inflation rate has increased and people can not purchase in daily life things.

There are several causes of poverty in Pakistan, chief among which is having education. The reason is that, education has caused of poverty in Pakistan which may be considered by the government. The poor persons has not afford the education because they live in poverty. The government of Pakistan should make policies, and denote the free education primary to university level. According to the Nelson mandella, 'education is a powerful weapon, we can change through the world. Hence, education has finished the poverty in Pakistan and through education we get prosperity in world.

These are several causes of poverty in Pakistan, chief among which is having health. The reason is that, health has caused poverty in Pakistan which may be considered by the government. The poor families has not afford good health facilities and the rate of diseases is increasing day by day. The government of Pakistan should have build the hospitals for the better of people. A survey shows that, the rate of health in Pakistan has increased 63.5% during few years. Thus, the health is a right of every people, the government of Pakistan provides health right with faithfully.

There are several consequences of poverty in Pakistan, chief among which is having higher crime rate. The reason is that, crime rate has caused of poverty in Pakistan which may be considered by the government. The crime rate has increased day by day in Pakistan. The government of Pakistan does not control the crime rate, otherwise crime

rate reached at high level. A survey shows that the crime rate in Pakistan has increased during some years. The Pakistan government should not take action about crime rate then crime rate has increased in Pakistan. In summation, the crime rate give rise to poverty.

There are several consequences of poverty in Pakistan, chief among which is having low agricultural productivity. The reason is that, low agricultural productivity has caused of poverty in Pakistan which may be considered by the government. The agricultural productivity in Pakistan is very excellence. The poor persons of Pakistan depends on the Agricultural productivity, so, government of Pakistan has boosted the low agricultural productivity. A survey shows that the 24% of Agricultural productivity in Pakistan has increased during few years. Thus, we save agricultural productivity, then we have finished poverty in Pakistan.

There are several consequences of poverty in Pakistan, chief among which is having poor governance. The reason is that, poor governance has caused of poverty in Pakistan which may be considered by the government. The government of Pakistan has facing some problems such as poor governance. The government of Pakistan has very poor governance. The IMF does not afford more bullet package. Thus, the poor governance is a big problem for Pakistan government.

There are several consequences of poverty in Pakistan, chief among which is having high rate of taxes. The reason is that, high rate of taxes have caused of poverty in Pakistan which may be considered by the government. The govt of Pakistan has got loan from IMF, IMF gave loan with high rate of taxes. The poor persons in Pakistan can not afford things because they live in poverty. A survey shows that, high rate of taxes has increased 5.6% in Pakistan. In a nutshell, the government of Pakistan should have reduced the high rate of taxes in Pakistan.

There are several consequences of poverty in Pakistan, chief among which is having low national income. The reason is that, low national income has caused of poverty in Pakistan which may be considered by the government. They do not export things out of country because low national income in Pakistan, Pakistan is facing high rate of poverty during some years. A survey shows that, low national income rate of Pakistan is . Hence, the government of Pakistan should have make plan for boost up national income of Pakistan.

There are several recommendation of poverty in Pakistan, chief among which is having quality education. The reason is that, quality education is beneficial for poor person family which is having poverty in Pakistan. The quality education has finished poverty in Pakistan and become future of Pakistan is bright. According to A Malala Yousaf Zai: One child, one teacher,

one book and one pen can change the world. In a nutshell, the quality education has finished poverty in Pakistan and the future of Pakistanis people are bright.

There are several recommendation of poverty in Pakistan, chief among which is having promote unemployment rate. The reason is that, ^{recommendation} of poverty addresses the unemployment rate in Pakistan. The government of Pakistan has made plan to reduce poverty in Pakistan, and increased rate of unemployment in Pakistan. A survey shows that the unemployment rate in Pakistan is 5.6%. Hence, the government of Pakistan has prepared policies to reduce the unemployment rate in Pakistan.

There are several recommendation of poverty in Pakistan, chief among which is having good health facilities. The reason is that, ^{recommendation} of poverty addresses the good health facilities in Pakistan. The persons of Pakistan are very poor and they live in poverty. The duty of government is that, provides good health facilities for every citizens of Pakistan. A survey shows that, about 50% of childrens of Tharpakar Sindh Pakistan have not provided good health and they are died in different diseases. we can say that, provides good health facilities that save life of childrens.

There are several recommendation of poverty in Pakistan, chief among which is having awareness about suicide attack. The reason is that, ^{recommendation} of poverty addresses the awareness about suicide attack. The poor persons has not afford things used in

daily life then they are living in bulling. A survey shows that, the people of Tharparkar district (Sindh Pakistan) are died in suicide attack during fifteen years. The rate of suicide attack day by day has increased in rural areas of Tharparkar district. Hence, the government of Pakistan gave awareness about suicide attack, and reduce poverty rate in Pakistan.

There are several recommendation of poverty in Pakistan, chief among which is having progress in agricultural product. The reason is that, recommendation of poverty addresses the progress in agricultural product. The land of Pakistan is agricultural so, it produced high opportunities for employment. Agricultural product has finished poverty in Pakistan and Pakistan has brights in future through agricultural product. A survey shows that, Pakistan has provided more than 27% of agricultural product. Thus, we save agricultural product, save life of Pakistani people.

In a summation, In Pakistan, Poverty rate has increased 30% to 40% during few years. According to MPI, the rate of poverty falling 56% to 39% in Pakistan. The government should not control on poverty so, poverty rate has increased in future. There are several causes and consequences which have need recommendation. These causes and consequences have made poverty ineffective to a great extent. However, by applying stem measures, its effectiveness can be restored. And some recommendation of poverty in Pakistan such as, quality education promote unemployment rate, awareness about suicide attack, good health facilities and progress in agricultural product.
