

Essay's outlines

TOPICS

I Artificial intelligence

1 Artificial intelligence: its merits and demerits

1 Introduction

2 Brief overview of Artificial intelligence

3 How AI modernized today's world

a) opportunities of AI in Gov business

b) AI strengthening democracy

c) it enhance security and safety.

d) increasing the yield of agriculture products

e) Reducing the impact of climate change

f) Improving healthcare system

g) Promoting global economy

h) Helping in the field of education

4 Do humans need to be afraid of rapidly developing AI based machines

- a) invading human privacy
- b) Threat of AI to democracy
- c) Leading to unemployment
- d) socio-economic inequality as a result of AI
- e) Artificial intelligence turned the literacy world upside down
- f) changing the perspective of decision making through automated advisors
- g) Accelerating hacking and terrorism.
- h) Liability: who is responsible for damage caused by AI

5 How to mitigate the risk of AI.

- a) create organizational AI standards
- a) underscoring need for regulations.

6 Conclusion

PrecisTitleSocial Structure of colonies

Culture has two aspects formal and informal. Both are inherent component of social structure.

They are changed and modified because of this and cannot be resolved without social structure.

Therefore, cultural problems of under developing countries also analyzed their problems in the light of social problems. For example since ages, countries either had feudal or tribal structure and even now they both exist in terms of division among tribal and different classes. This is the fundamental structure of colonies.
