

Topic:

The population growth in Pakistan can erupt like an Atomic Bomb. Comment

Outline:

1-

Introduction

Real problem is not population explosion, but what population is doing. Population growth offers more opportunities rather than disadvantages. By taking efficient measures and making right policies to manage the population, can help to stabilize the economy of Pakistan. There are many causes of population growth, which includes low literacy rate, higher rate of unemployment, dearth of family planning, arrival of refugees, etc.,. The opportunities which population growth offers are growth in industrial and agriculture sectors, more demands and supply of goods & services, source of human capital, source of skilled labour etc.,.

But, due to Population growth, it leads to many disadvantages, including criminal activities, ethnic and tribal clashes, Cause of global warming, leads to poverty, Food insecurity, higher rate of unemployment, (higher) ^{Lower} rate of Per Capita Income. Although, Population growth causing many problems to any country, but it offers more benefits as compare to problems. By taking efficient measures and making right policies, can help to stable the economic condition of a country.
