

Artificial Intelligence can be the Savior of Human Race

Outline:

1. Introduction

Thesis statement: In the modern era, the fear of insecurity makes Artificial Intelligence, a savior of human race. But, the opponents of Artificial Intelligence feel that it is a threat to human being. However, it has more benefits which make it savior of human race as compare to its harm.

Q. How Artificial Intelligence can be the savior of human race

3. Artificial Intelligence is a savior of human race (thesis)

a) By ^{giving} predictions, it can be helpful to improve economy.

b) Artificial Intelligence based missiles and rocket can be

useful for storage defense system

c) Space programmes can be launched for research and development.

d) Artificial base. Intelligence based websites can be useful for quick and efficient response.

e) The strongest privacy can be achieved on different platforms.

4. Artificial Intelligence is a threat to human race (Anti thesis)

a) Miscalculations may leads to wrong predictions

b) Artificial Intelligence based defense system may leads to start world war III.

c) Space programmes are expensive which may further hinders poor countries economy.

d) Artificial Intelligence based websites can also be use

to retrieve personal data.

e) Through Artificial Intelligence, strongest hacking techniques can also be achieved.

5. Despite some challenges, Artificial Intelligence can be the saviour of Human Race (synthesis)

a) Miscalculation is the human fault not AI based machine fault.

b) In the past, there were two world wars because of human being ^{even} ~~not~~ at that time there was no AI

c) Initially space programmes may be expensive but it has long term benefits

d) Use of Artificial Intelligence depends upon the background and mindset of the user.

e) AI is not the main source of hacking but the dark web.

6. Conclusion:
