

Artificial Intelligence Can be the

Savior of Human Race

1. Introduction

2. Artificial Intelligence: A Savior of Human Race

a. Potential to increase agricultural growth

b. Industrial production would increase by using AI

c. Helps to fight climate change

d. AI based medical science saves lives

e. AI can advance ~~human~~ learning to save human race

f. AI can be used in mining, rivers and other difficult areas to ensure human prosperity

g. AI can help in construction at difficult terrains to save human race ~~from~~

h. AI an effective tool for border management with less human involvement

3. Threats to Human Life by Artificial ~~Intelligence~~ Intelligence:

a. AI system can be biased due to their algorithm or training data

b. Non-Human trait can lead to cruelty and often decision on set trends can result in wrong decisions

c. AI can have potential to overcome Human-Beings

4. Recommendations and way-forward:

a. Regulation of AI developers

b. Transparent and open Algorithms

c. Technology should remain subservient

to human-beings
5. Conclusion
