

Artificial Intelligence can be the Saviour of Human Race.

Outline:-

(1) Introduction:-

Thesis Statement:-

Artificial Intelligence has a potential to address many complex challenges humanity faces facing humanity, from healthcare to climate change. However, its impact depends on how it is developed and utilized. Responsible and ethical use of AI is crucial to ensuring AI benefits society as a whole.

(2) How Artificial Intelligence can Be The Saviour of Human Race :-

(i) Improved Healthcare by advancement in diagnostics and treatment.

(ii) Enhance Efficiency at workplaces.

(iii) Environmental conservation by monitoring and managing resources more efficiently.

(iv) By developing Sustainable Solutions for climate change.

(v) Advancement in Education.

(3) Challenges that may occur with the advancement in AI :-

(i) Ethical and legal challenges of artificial intelligence.

(ii) potential loss of jobs.

(iii) Overreliance on the technology increases laziness in humans.

(iv) Biased information hallucinations.

(4) Recommended framework for addressing challenges.

- (i) Development of Ethical guidelines for AI use.
 - (ii) Data used to train AI algorithms should be diverse.
 - (iii) Develop legal framework that clarify who is responsible for the actions of autonomous machines.
- (5) Conclusion :-
