

# Artificial intelligence can be the savior of human race.

## 1. Introduction

Thesis statement Artificial intelligence has both positive and negative impacts on mankind. But it can be the savior of human race. Because it helps human to upgrade level of education, to increase safety and reduce workload etc.

2. Artificial intelligence saves mankind from/in difficult situations

3. How can artificial intelligence be savior of human race?

a) Artificial intelligence uplifts economy (e.g. through industrialization)

b) Safety and security of human is possible through Artificial intelligence.

c) Artificial intelligence upgrades the level of education

d) Workload can be reduced by the use of Artificial intelligence.

e) Artificial intelligence improves.

health sector.

4. Artificial intelligence gives human race a lot of problems to human race

a) High cost of artificial intelligence proves burden on economy

b) Artificial intelligence is harmful for privacy/security of man.

c) A.I tools decrease the ability of critical thinking of students.

d) Artificial intelligence replaces human in many ways.

e) Diseases are increasing because of Artificial intelligence.

5. Besides all problems, Artificial intelligence benefits man a lot.

a) Cost of artificial intelligence is less than its GDP growth.

b) Privacy/security of human may not only affect by Artificial intelligence.

c) Students can learn more by using A.I tools

d) Artificial intelligence provides employment and increases human involvement.

e) Diagnosis of diseases can

be possible through Artificial Intelligence  
b- Conclusion
