Artificial intelligence can be the savior of human race.

1 - Introduction

2 - Corelation between AI & human race

3 - AI: the saviour of human race
  a - Effective contribution to education sector
  b - Modernizing health sector
  c - Making transportation an efficient & advanced system
  d - Contributing to master defence strategies
  e - Boosting economy

4 - AI: the destroyer of human race
  a - Lacking of critical thinking
  b - Chances of failure in diagnosing diseases
  c - Potential distraction caused by smart mobile apps used in transportation
  d - Militarized AI will aggravate insecurity in world
  e - Replacing humans: increasing unemployment

5 - The guardian of human race : Artificial intelligence
  a - Enhancement of E-learning in this technological era
  b - Making possible the cure of cancer like diseases
  c - Saving time by showing traffic congestion areas
  d - Advanced detection techniques will improve security
  e - creates job opportunities for technological experts

6 - Conclusion

"future of humanity will be shaped according to the way they utilize Artificial Intelligence"
~ Yuval Noah Harari
