d) Surveillance is necessary in the digital age.

Stance
Out

1)

e) Strict censorship prevents hate speeches and propagation of extremist agendas.

05) Despite having its benefits, it has much more perils (Synthesis)

a) Hackers are enhancing their skills with advance cyber system and security advancement

01
01
b) Online therapies are still not solving the disseminating mental health issues.

c) Despite job creation, blue-collar workers are still facing challenges and jobless.

d) Government and major companies exploit the privacy of common citizens under the garb of providing security.

e) Biased censorship mechanism promulgates hate speeches by posing it as their freedom of speech.

06) Conclusion.

Stance: IT is a blessing

Outline:

01) Introduction:

~~Thesis Statement: The expansion of information technology has both perks and perils. However, in recent advancement, IT has much more benefits, such as, providing automation machines~~

The expansion of IT has both perks and perils. However, the

Stance: IT is a blessing

Outline:

1) Introduction:

Thesis Statement: The expansion of IT has both perks and perils.

However, the benefits are much more, such as, provides ease to human in automatic tasks and decision-making.

Therefore, by making a proper checks and balances, IT perils can be reduced for prosperous use of technology.

02) The phenomenon of expanding information technology (IT)

03) The expansion of IT is a blessing: (Thesis)

a) Information technology helps government in decision-making by providing huge data base.

b) ~~It~~ Information technology assists in propagating political manifestoes to every individual easily across the country.

c) Advance machinery boosts economic growth and creates jobs.

d) Provides strong cyber security to protect the data of common citizens.
