# The Cost of Inaction is greater than cost of Action

## Outline

### ① Introduction

### ② Crunch Paragraph

Why cost of inaction is greater than cost of action

a. Satisfaction with the present condition stops the social growth and infrastructure.

b. Stagnation of economic development.

c. Cessation of any chance of success.

d. Reputation in international world damaged.

e. Doing away the decision making power.

### ③ Conclusion

Essay: American President John F. Kennedy said:

"There are risks and costs of actions. But they are far less than the long-range risks of comfortable inactions".

When ~~their~~<sup>his</sup> nation started to practice this leader words, soon they were on the moon. They took risk

instead of facing the superiority of Russia

and were superior over Russia soon. Same happens

in a layman life as well as states. Satisfaction

with the present condition stops the social

growth of society and man. Doing nothing and

sit with hand on hand stagnate the

prosperity of nation. If a simple problem not solved

then it becomes a complex issue of the

society. Timely actions are needed to cope

with that. The ineptness toward climate issue

by all the nations are alarming. The disastrous affects are already prevailing in the form of floods, heatwaves, Hurricanes etc. Timely actions are needed to solve these issues because comfortable inactions leads to uncomfortable disasters.

The statement "The cost of inaction is greater than the cost of action" means it is better to act on time and bear its consequences than to do nothing. The example of economic boost of China is noteworthy. It took risks and critical decisions which now regarded China as the second biggest economy. It is challenging the world's super power America by actions.

A social evil must be handled on time, otherwise it becomes the cancer of the society. The prevailing social evils and social crimes in Pakistani society shows the ineffectiveness of the Government.

Economic stagnation of any state depend on its false policies and their implementation. Pakistan categorized as hyperinflated country with 30 percent inflation. A destabilize economy shatters the infrastructure of state investment and reserves reduction, loss of revenue generation affect the GDP which influence growth of economy.

If a state doesn't have quick decision making power and then implementation with sporadic actions, it loses the trust in international

arena. Foreign investment reduction in Pakistan is the good example.

Cost of inaction often pays by leaders by losing their leadership role. Ineffective handling of covid-19 pandemic by America payed off by Trump Administration lost of power.

The cost of inaction always pays greater. Inaction sometimes occur because of the vested interest of people of high officials. But these cause horrible effects in others life. Challenge must be taken because it boost the best part of side.
