2) A culture of socialization within boys is more common in co-education

3) Co-education lack the effectiveness of study

4) A learning environment is vary for both genders

5) A mixed education promotes more lustfull environment

Single sex education institute is very important for the well being of students. The students are not involved in psychological, social and physical problems due to single sex education. It brings peace and prosperity in the society. The students are perform very well in their academics according to their environment. A Fear of being silence is removed in the single sex education. On the other hand, mixed schools creates many problems in the society. These are some gender discrimination, cyber bullying, socialization within boys and illegal sexual acts. In a nutshell, a separate institute for girls and boys are very important for the study.

Cyber bullying is increased more in the mixed schools. The social problems are increased day by day due to this system. Study is not the main point for the education in the mixed school. A difference of learning environment is happened in the mixed system of education. A harassment problem is not <sup>only</sup> link with the mixed schools. These type of problems are everywhere in the world. Goals are very important for the accomplishment of goals such as study. Cognitive abilities are not being judged on the basis of environment. Focus is required for the proper function of mind. †

Cyber bullying is being increased in the co-education. The girls are not feeling safe in the schools and colleges. Boys are doing illegal acts with the girls. For example, boys do online messages on online platform such as Facebook, Instagram and Twitter. This type of cyber bullying becomes a major challenge for the education of women. To decrease this type of illegal act, a separate single-sex education sector is very important. Other than cyber bullying, there are many problems such as socialization.

Socialization within boys lead to the destruction of normal norms of society.

A concept of socialization is very famous in the co-education institute.

A concept of socialization is linking with the modernism. A socialization within boys leads to illegal act. For example, if a poor girl get admission in the co-education school. It is compulsory for her; that she goes with the boy. If she does not want to go with boys. A class difference is creating among them.

So, it is important for a separate institute for girls and boys.

Other than social problems, the co-education has adversely effect on the study. Study is not the pivotal part of education. A race of gaining more numbers is enhancing in the mixed schools. Learning and study is

not the central point. By gaining more numbers serves as a tool to degrade others. For example, co-education imparts a very good effect on the femo male. A mixed school is boys oriented more as compare to girls. They perform very well in that institutes. It becomes a challenge for girls. A competition of marks is developed among students. A single-sex education is very important for the progress. Boys and girls have different cognitive abilities. They have different ways of understanding. The methodologies of learning are very different. For example, boys are very good in mathematics and science. Girls are very performing well in the philosophy and literature. So, a huge difference is present among them. So, it is very important for the progress; that a single sex education is existing in the country.

Mixed-education system increases the temptation among students. The temptations are the major cause of illegal sexual problems. The students are easily distracted from their study. Women are the prey of a temptation. There are many psychological, biological and social problems that arise due to co-education. For example, many students belong to a poor class family who get admission in the university. He does not

give attention to their due to these problems. He involved in the so called culture of boyfriend and girlfriend. If he could not a part of this culture. A slogan can make on him. So, mixed education system destroy the education of Pakistan.

Cyber bullying is not only happen in the schools and colleges. The harassment is happening in ever anywhere of the world. It is not only happen in just schools and colleges. According to a report of Alliance against sexual harassment, 93% of working women were faced harassment in both public and private sector.

A choice of socialization is depend on person. Girls are freely rejected the option of socialization. No body cannot force her. Socialization bring confidence for the girls. It removes the gender disparities. For example, socialization impacts a positive role in the society. According to a theory of Communication by Habert Thomas, a solution of different problems generate by discourse ethics. Different arguments brings create solution of the problems.

Other than these problems, Study is not affected by co-education.

Study and enjoyment go hand in hand. There is a time management in the both the sector. A lot of

student perform very well in the mixed schools. An academic performance is enhanced by the co-education. A competition of doing more better with other is developing. When students are doing more study, it is good for the economy. An economy problems <sup>show</sup> easily by the critical thinking. A critical thinking is enhancing more and more in the co-education sector.

Still Cognitive abilities are not being judge on the basis of difference of institute. If a person goes to mixed school. They have more exposure to the environment. They have sharp abilities. Cognitive sharpness depend on the person willingness. Cognitive abilities are not increasing by the discrimination of institute. Cognitive abilities are increased by the rigorous assessment of individual. So, this type of stereotype does not link with cognitive <sup>abilities of</sup> individual. Temptation are <sup>not</sup> only increasing within co-education. Self control is very important. These are just excuses for not doing nothing. This is an era of 21<sup>st</sup> century. A modernism is enhancing day by day. All the girls and boys are work together for the nation. According to Quran, self control is the key to success.

The problems of cyber bullying is more common in institutions than any other sector. It is more common in schools, colleges and universities. According to a research, the boys (70%) involve in the bullying process. Women are the victims. Boys are mainly involve to tease others in the institutions.

A culture of socialization is more prevalent in the institute without the will of girls. This type of socialization among girls and boys lead to a many problems such as romantic relationship. According to a research of China Education Panel Survey (2021), showed that the adolescent's romantic relationship has adversely affect their academic performance. They have poorly perform in their studies. So, it should be a separate institute for girls and boys.

Study is not the central part in the co-education sector. It becomes a challenge for the women. A mixed education system is more men-oriented. An instructor can do favours to the men as compare to women. So, the promotion of education is not possible in that environment. Learning and study are not their concern. It creates a gender discrimination for the students.

So, it is very important for a strong nation. Gender equality is the primost priority for the students in the education sector.

A different environment for different cognitive abilities are very important for the proper function. A human brain works very efficiently in the proper environment. An learning environment is different for girls and boys. For example, women are not perform very well in the STEM. On the other hand, boys have expertise in the STEM. Girls are not doing openly talking about their problems in the mixed schools. In a nutshell, a different learning environment is the cornerstone for the proper functioning of a human brain.

A mixed education system prevails the justfull environment for both the genders. Male and female are easily distracted from their study. A major obstacle for the students are nowadays is to combat with their desires.

These justfull desires serves as a tool to destroy the future of a student. When a student completed their study in that environment, it was compulsory for him to involve in illegal social acts.

In the end, there should be colleges and schools just for men and some just for women. A lot of problems are being resolved due to single-sex education. A social, psychological and mental problems are easily resolved due to this type of education system. A happy environment is being created due to single-sex education system.
