Civilizational decay is a gradual erosion of a society's core values, institutions, and overall functionality. It manifests through declining moral standards, weakened social cohesion, and a loss of collective purpose. Economic disparities widen, political structures crumble, and educational systems falter. Decay often stems from internal corruption, external pressures, or a combination of both. As institutions deteriorate, trust erodes, leading to a breakdown in social contracts. The decayed civilization struggles to adapt to changing circumstances, resulting in a vicious cycle of decline. Understanding and addressing the root causes become crucial to reversing the trajectory and revitalizing a society in decay.

Decay of civilization starts with weakening of social bonds. With time, this weakening spreads and affects institutions and eventually state. It is therefore crucial to identify the root cause of decay to make society better.
