To begin with, our attitude can determine our success if we would have a positive attitude towards X

Positive attitude is something which determines or leads to positive consequences. These words reflect that our positive attitude towards the negative situations or our life's odds can bring positive consequences as optimism is a faith through which achievement can be drawn and nothing can be done without hope.

In addition, our attitude with our elders holds a significant place in our success in this world or even in hereafter. Our attitude with our parents is something that plays a vital role in our path to success, their prayers can unfold the horizons of ^{opportunities} ~~success~~ in our life. Not only this, but our attitude with our parents and elders is determined our fate as well as Imam Ali (as) says, "Be good to your parents and your children. will be good to you." These words spoken by the greatest successor of Islam elaborates that good behaviour or attitude with our parents ~~will~~ results in that our children would be good towards us as whatever today we do tomorrow come back to us.

Furthermore, helping our friends in their hard times reveals our best attitude which can determine our success as friends are the one who lift each other up in each others hard times.
