

# Can Existing economic policies overcome the economic dilemmas of Pakistan?

## Outline:

### ① Introduction

**Thesis Statement:** Despite complex economic dilemmas, the economy is not getting right track with the help of existing robust policies. In order to consolidate the improved dynamics of the economy, more affirmative (policy) measures are needed.

### ② Understanding the existing economic policies.

### ③ Existing economic policies robustness for economic situation of Pakistan.

(a) Focus on high imports than exports ~ Increasing balance of payment crises.

(b) Poor taxation mechanism ~ Collection through corrupted.

(c) Existing of undocumented economy ~ Barrier to progress

(d) Pakistan's external public debt - Pakistan's undying debt dominance

(e) Huge amount of tax over domestic industries.

### ④ Existing economic policy ~ Only solution to overcome economic dilemma

(a) Due to natural hazards its necessary to import more than export due to fulfill basic needs.

(b) Corrupted ones are everywhere it's not the issue.

(c) Undocumented economy is the dream of politicians.

- (d) Existing debt is not the issue because world power USA has more debt than Pakistan.
- (e) Tax is necessary for the running of state.
- ⑤ Current economic policies cannot reduce the economic dilemmas in the State.
- (a) For the basic needs of people use domestic products than imported ~ Nationalism perspective.
- (b) Corruption in the institution leads the downfall of State so, that's the reason of less tax collection
- (c) Undocumented ~~economic~~ economic policy is the way that increase economic dilemmas.
- (d) The GDP of USA is very high because of this existing debt is not issue for them. But, Pakistan is a less GDP state.
- (e) Protection over domestic industries creates hurdles for exportation ~ huge BOP crises ~~creates~~

⑥ Conclusion
