3.	Classification of State:	
	He was the first	
	person who classifier the	
	state into six types which	-

ss in fact, kind of jovernments and it still holps people to identify them on his given classification. There are some governments who are morarchy, democratic etc as there is democratic etc as US , India and Pakistan and Monarchy in Indonesia.

Rise of Middle Class. dristatle gave importance to middle class and said prevention of revolution so, today middle class is yenry powerful and com turn the tables at any time and anywhere. Concept of distributive Justice.

He gove concept of

distributive justice that whoever

does good to me state at the

State should appreciate the

him. It means that state

Should appreciate one on

the basis of one's contribution.

So, today, every state acknowledges

the contributions of its people

and appreciates them by

ziving them verrious honours

or privileges. To conclude, it can be said that Aristotle gave a nammoth contribution in scrence by discussing state and gave them now place and direction to Stabilize. The part played by him in this regard is still relevant today in one way or the other.
