

TOPIC:

EVOLVING MINDS WITH EDUCATION.

and where is the paragraph????

In the stated paragraph, The author expresses his contradictory feelings towards a certain group of people for whom education is nothing more than a means of career and opportunities. The

author labelled these people as "too individualistic".

According to him education should set the bird of mind free and offer an individual with moral development and mental stability which children are unable to gain otherwise.

main idea is picked but the sentences are too long
never use symbols in the English paper its is not appreciated at all
sentence structure is poor basic grammar is poor
and word count is also missing
