

ENGLISH ESSAY

TOPIC:

Improve sentence structure and grammar

Also focus on proper deconstruction of the topic

"If Gold Rust, what shall Iron Do?"

OUTLINE:

1) Introduction.

Thesis Statement:

Of the **role** model fails to protect itself, then how the followers will protect themselves. An upright and strong **idea** will only become a role model for others. Without following the said principles itself one cannot be a **star**.

2) How the rusted gold be a role model for iron?

3) At microlevel view

Phrase it properly

- a) How immoral elders become a mentor for children
- b) How the social activists who neglect their own family bind the society.
- c) How those feminist who themselves disrespect women, teach masogynist to respect women.
- d) How impractic the religious mentors become the role model if they don't themselves practice it faithfully.
- e) of protectors of law don't follow law themselves, how they will teach masses.

Understanding of the topic is not correct

4) AI Macro view

- a) Unaware & dishonest teachers can't shape an aware & honest nation.
- b) Toppers of Universities are not suitable for jobs then who is next in line.
- c) How unemployed PhD holders ensure the worth of education.
- d) Debt crisis, an issue of developed nations then how developing & underdeveloped get rid of it.
- e) AI is a threat to core, then what about peripheries.
- f) super-powers are concerned for

Cyber security Then how world will deal with it.

5) - At Global View

- a) Peace seekers are not in favor of peace
- b) Ambassadors of humanity overlooking humanity.
- c) Ensuring equality is a lollipop
- d) If UN fails, then who succeeds.
- e) If leaders of developed democracies overlooks the masses' opinion then who will consider the needs of developing ones
- f) If concerned are the contributors, then who will tackle the crisis.

b) Conclusion.

~~words must be synchronize with actions.~~

Faulty understanding of the topic

Essay

Hundred hits of iron-man are equivalent to only one hit of gold-man. But if the latter uses a rusted gold hammer, it his hit will lose its worth and the desired outcome will lose. This happens when the gold keeper fails to protect his gold from impurities. It is a very concerning point as if the model fails to protect itself then how the followers teach or from whom they will learn to protect themselves. Leaders are the model's, they have to figure with environment and it had to stand resistant to remain as a model, as only a strong and upright person is a role model for others. If his words are not in coherence with his actions, he cannot be a star. The concept is practically applicable at micro to global level, where non-synchronization of words and actions is continuously pushing to the pile of crisis. As an immoral, illiterate, dishonest person cannot produce a moral, literate and honest person.

Similarly, the nations and organizations seeking peace and advocating humanity cannot ensure these golden goals without implementing their own laid rules in the same way as law enforcing agents cannot ensure law and order until they themselves don't obey law. The ideal must be a presentation of bravery and courage. The followers would not be afraid of those things which are not a matter of threat to their hero. If hero is afraid of something, it's a matter of great concern for his fans. AI and cyber security are major threats to the core, leaving peripheries in a dark tunnel. But where there is a will, there is a way; simply following their said principles and religiously following these can enlighten the path for others also along with themselves.

Rusting is a notorious quality of iron. Even if it is painted, it reacts with oxygen and moisture

of damage itself. It is highly reactive & sensitive to water and oxygen, therefore fails to retain its identity in presence of these. Rusting gold is symbolically used for precious items when they fail to retain their identity. Precious people and things are strong and resistant in this regard, therefore are called worthy. But if they also become reactive to their surroundings, as iron do, these will become worthless or at most like the iron, a cheaper one. Even if iron is not rusted, it is very useful and worthy. It loses its importance when become rusted. Similar is the case of gold, when rusted is useless and cheaper, otherwise a symbol of wealth and luxury. Pure gold is a very delicate and soft metal while when mixed with some other metal like copper or brass, it gains enough rigidity to make jewellery and coins. While iron when reacts, rusted out and weakens itself. Gold teaches iron, how to stay in harsh surroundings and to make itself

Stronger from experiences and hurdles. But if gold itself become waste, how it will teach iron. It is similar to the scenario that how US-led IMF teaches Pakistan to come out of economic crisis through strict policies when US government itself facing a huge debt crisis.

Starting from micro-level, children consider their elders as their role models. They learn the way of living from them. They just not listen but adopt more from observing their surroundings. The one grown by moral and respectful parents are totally different from those raised by immoral and disrespectful parents. Even if a mother teaches her child to speak truth, and at the same time tells lie to her husband in front of child. The child learns to teach other speaking truth while himself speaking lie. This is how, a child is spoiled at home.

Similarly, the social activists do

to their families they have a very good PR. might be millions of people are influenced by them, to whom they are teaching how to be polite to their young ones, what's the importance of education etc. But at the same time their own children are the victims of their own harsh behavior and neglect due to their tough routine and anxiety. At the ~~same~~ whole episode of Anshera Ujala showed decades before on PTV. There are thousands of doctors around us who used to take addictive drugs to release mental stress, while knowing its consequences. How could these doctors run an anti-drug campaign.

Pakistan is an Islamic country. Islam teaches to respect women and allows them to marry to whom they want. Also it bounds parents to ask their daughters, while choosing their spouses, for their will. Despite these teachings muslims in the country don't consider their daughters for their will. Not only that, honor

Killing is a usual practice in some areas upon resistance. A father in London gun shot his 16 year old daughter for not marrying according to his will, later killed himself also (Jan, 2021). Even these kind of people are very few in Pakistan, yet not spoiling the image of Islam and Pakistan.

The issue sprouts from clerics, who teaches religion to others while not following it themselves. As a result either people will follow the wrong religion or not bother to follow it altogether. Subcontinent is embraced with the beauty of Islam by the teachers of soft words, who were ambassadors of Tawheed. They loved everyone and teach love and respect to everyone. But clerics of today are mostly fond of devil. They are just messing up the religion and fueling the sectarian issues. The young learning religion from these are resistant to consider Islam as a peaceful religion, as growing Islamophobia shows.

Similar is the case when the police officials, lawyers, judges or military vehicles don't follow the traffic rules how would the masses learn from them to obey law. When a police man wearing no helmet came from wrong side of road just crossing a red signal, seen by a child or any other citizen, will only help to lose deterrence of LEA. Thus paving path for criminal activities in the area and thus to whole nation.

Teaching in Pakistan is just a time pass. Those who do not get a job anywhere or waiting for their dream job, come to teach in school thus spoiling the already spoiled nation. How an unaware and irresponsible teacher shapes the nation's asset into an aware and responsibly active nation. Therefore, teaching department should be payed prime importance if Pakistan really wants to progress. They have to groom a brave nation that could

Lead and present its views with-
out insulting any organization
and persons of the country. This is
only possible when the system has
good merits.

Due to this neglect of teaching
departments, the toppers are out-
characterized with full GPA
and A grade. The reward is
earned through cramming not
learning. As a result when
go for job interview or test, they
fail. Parents of an average
student scolded their child by
role modeling the toppers, but when
the goal of education - job - is
not even earned by the toppers
how the remaining children be
motivated.

Same is the scenario, when
PhD holders are found on the
roads of Islamabad to protest
for not having jobs. How the nation
devalues the worth of education.
Fondling these doctors in strikes is
showing the harsh & real face

of Pakistan's progress. Almost more than a 15000 PhD holders are unemployed and pouring thousand every year by the universities. At least they are not going to glorify the worth of education in Pakistan.

Unemployment issue then leads to economic issues. When people have nothing to earn, where they could spend. Thus resulting an imbalance in demand & supply cycle leading country to debt crisis. But the matter of concern is if US itself is facing a debt crisis then how western economy led institutes like IMF enlighten the path for Pakistan like countries. The policy makers try to learn from them but at practicable level, it is of no fruit.

To overcome unemployment a major hurdle is the growing AI & robotics which is taking human jobs very fastly and accessibly, leaving the humans especially developing nations in great concern for their

future. Despite jobs, AI has far more dangerous complications. AI is far more dangerous than humans think (Elon Musk). If multi-billionaires are afraid of this technology, while pouring billions of dollars in the its trunk & the peripheries are at the helm of core for this issue.

Similar is the case of cyber-security. Cyber crimes are non-physical in the sense of their nature but very dangerous in their practicability. One is not killed or raped, but his privacy is totally breached by cyber-crime. His voice & face can easily be used for doing any kind of crime. All the developed nations are very concerned for this issue as with the rise of the technology, cyber-crimes are also increasing. According to the LEA reports of US, there are almost 2% increase in cyber-crimes in last five years. These crimes are more of national concern than

of individual. Because hacking
Nadro's database is very alarming
rather hacking a millionaire's account.
At the global perspective, the
world gold is paving the way
for a new world war. At the
peace seekers are not in favor
of peace. West interfered in
Afghanistan and Middle East
for ensuring peace but vetoed
the UN GA resolutions seeking
peace in Gaza. How the world calculate
the US peace seeking from these vetoes.

Same is the case with the advocacy
of humanity. Humanity is above all,
is famous slogan in developed
nations. But for themselves only.

It has been more than 3 months
since Gaza Israel war. But world
is not advocating or practically
advocating humanity. Gazans cannot
be punished for the sins of Hamas.
There came Islamic teachings for
guidance, as a father can't be
punished for his son's sins and
a son cannot be punished for

his father's crimes. Israel has a right to defend itself and to fight its war, but with soldiers not the women & children.

UN fails to fulfill its objective of peace enforcer as it is not following its principle of equality where it is practicing equality. It has no power to direct the world where it is directing the world affairs, is not knowing equality. All veto by UK abridges the lollipop in the mouths of equality even in Security Council and also to the General Assembly.

The Jews of UK & USA along with other nations are asking for ceasefire in Gaza while the leaders on house are overthrowing the opinions of masses by using either veto or supplying weapons to Israel. If the Democratic nations are not considering the public opinion, the beauty of democracy, then masses of developing nations must stop

to think to build their opinions,
as no one is going to ask them
about their will.

Same is the thing with the
climate issue. The most concern
for climate change policies are
the major contributors to the
mess. US & China, are the leading
contributors of carbon in the
environment. World faced the
hottest year in 2023, along with
floods and cyclones as an
after consequence of climate change
but floods, cyclones, tsunamis, and
earthquakes are faced by global
south mainly. COP28 promised
for very positive outcomes but
cannot be fruitful until the
contributors changed their way
of living.

In a nutshell, until words
are not synchronized with
actions, gold cannot be a role
model for iron. Firstly, gold
has to show through its behavior
that it is gold, then it will teach

iron to withstand with the
harsh realities of surrounding
The upright, aware, honest, loyal
literate and morally sound
individuals can raise their
similar ~~to~~ ones if they remain
stick to their golden principles. A
constitution is easy to design
then to run it, similar is the
case with the principles. Raising
dogmas of peace, humanity, π
equality and democracy is
very fascinating but really
hard to implement.
