

"Education is no more education but an occupation."

Acquiring education which transforms into next phase of knowledge is an unstoppable process. It also comprises many new methods and techniques with the evolution of human society. In this modern age, the scenario has totally changed, because the humans have set different criteria regarding different things to live in this advanced age. Same is the case with the education. Education is no more education but an occupation, because in educational institutes, the quantity of students matters more than the quality of education, this is why, the schools, colleges, universities and multi-skilled teaching institutes

are producing a huge number of degree holders, who are deprived of moral values and they remain confused personalities.

For institutes, students are like blank cheques which financially support the institutions but they remain failed to produce the moral based character students. Moreover, the teachers try their best to teach the students in all dimensions but rude behaviour and tough love at a large scale are not allowed by the mentors towards the students in educational institutes.

It is crystal clear that the teachers ~~are~~ have no authority as their hands have been tied by the educational institutes. Some schools and colleges are also <sup>doing</sup> good by the production of

moral-based character students by but they feel much trouble after

completing their education and in performing their duties in the practical world. So there is a dire need to infuse nitty gritty details regarding their role in the institute as well as in the real world, so that they prepare themselves physically and mentally for the real challenges of their lives as well as student life to prove themselves worthy.

Sentence is too long. Break it down i to simple sentences.
