Even though more and more women have started taking up full-time jobs outside the house, they still end up doing all the housework. In spite of a demanding career, a woman is expected to be an efficient housewife but most men still do not make good house-husbands. When it comes to helping with the housework, many men feel totally helpless. When they decide to do a few jobs around the house, they pick the ones they enjoy. Sometimes if they are in the mood, they don't mind doing a bit of gardening or mending a few things but they refuse to do many boring jobs-like cleaning the house, washing and ironing the clothes, looking after the children or cooking dinner. Most of these jobs have to be done immediately and regularly, while household repairs, the job that men enjoy doing most can always wait till a more convenient time or till one feels like doing them. According to survey done recently, the lady of the house does three quarters of the boring household chores even if she has a full-time job. But surprisingly, housewives don't seem to mind, for most women still see their family role as the one that matters most. However, most women tend to use electrical appliances to make up for male laziness. Makers of household appliances and electrical gadgets are delighted, of course.
