

ARTIFICIAL INTELLIGENCE VS HUMAN LABOUR

OUTLINE:

1) INTRODUCTION:

THESIS STATEMENT:

AI is going to be the largest displacement of human labour in the history. A lot of jobs are going to be displaced by the human-made machines.

2) WHAT IS AI?

- i) AI is the ability of a computer to do human tasks.
- ii) Some AI can match humans in performing certain tasks.

3) CHARACTERISTICS & COMPONENTS OF AI

- i) Ability of AI machines to rationalize and take actions.
- ii) Its potential to capture unstructured data in the form of text, audio, video.

4) How can job market be affected by AI?

- i) customer service, data entry roles, computer operating roles and other jobs are at risk.
- ii) In spite of these replacements, technology is not the sole solution to all the problems.

5) ARGUMENTS IN FAVOUR OF ARTIFICIAL INTELLIGENCE

- i) AI can perform tasks in seconds which human hands are unable to perform.
- ii) AI can be operated in environments.

- hazardous to humans ✓
- iii) AI can operate 24/7 without a break ✓
- iv) AI can help in decision making in business ✓

b) ARGUMENTS AGAINST ARTIFICIAL INTELLIGENCE: Phrase it properly

- i) It could lead to displacement of jobs
 - ii) AI struggles to attain creativity, skills, intelligence as ^{humans} does possess ✓
 - iii) over-reliance on technology can create problems such as cyber threat etc. ✓
- 7) AI is able to perform boring repetitive tasks which human labour can't: ✓

8) CONCLUSIONS:

Work on maturity of ideas
Deconstruct the topic properly
