TOPIC:

Artificial Intelligence can be the savior of the Human Race.

Outline:

1. Introduction

Thesis Statement:

Artificial Intelligence can either make of break the future of the Human race. However, AI has greater capacity of being the saviour than the destroyer of Humanity. Ultimately it is upto Humans and whether they want a hero or a villain?

2. Coexistance of AI and Human Race

3. AI: The New Hero of Humans

a) Use of AI in War zone and reducing Human casulties

b) Esures the safety of rescuers by replacing them in dangerous circumstances

c) Can take over research and exploration in fields such as Nuclear, deep sea, Space (outer), volcanoes and etc, that may be hazardous.

d) Decreases the need of medical staff that have to come in contact with patients with transmissive disease in pandemics

Be certain

e) Self driving cars can reduce the factor of Human error that results in accidents

4. ~~In reality~~   *It is anti-thesis*

4. Realistically, AI is more of an *Anti Hero* with villianous tendencies

a) Usage of AI in warzone will result in more casulty for the other side with more precision in Target

Avoid writing conditional sentences

b) If the rescuers are AI, then How would one hold it accountable if anything were to happen to rescuees

c) AI may not take up all information that Humans may think are relevant.

d) lack of ease of communication between AI and patient may result in incorrect diagnosis

e) AI tends to make unpridictable decisions in real life and unique senarios which may threaten the life of person on the road.

5. Task specific programming and collaboration with Humans can deminish the negatives

a) Use of AI, like nuclear weapons in warfare will act as a deterent and overall reduce wars

b) AI is not prone to Human errors so it will

be more reliable than a human service.

c) Greater information capturing /gathering capacity of AI enables people at station to filter and take out any information they need

d) AI can be, with time, developed such that its UI is human like interaction

e) More Training with datasets of reallife scenarios will fine tune AI to ensure the safty of passenger and pedestrians alike

6. Conclusion

Be careful about structure of the sentences
