first misuse of exection of deepforkes like spreading fake scandles through Social media or creating take Al technology. These contents can be used to deceive, defame amonipluate individuals and events For example 1 il now er days some people create fork snaps and videos to deforme una blackmail other people Substantiate your argument Continues to advances it has brought threat regarding personal data privacy. Al system often vely or Voist data to improve its performan This data can be consist personal information such as addressess, financial information and sensitive information such as medical records and security sumber Some people and organizations hack this dontor due to wen

security and by using this information they can course loss of related person. Some hackers con hack boink account due to weak security and passwords, and course Could fall into wrong hands either through backing or other security breaches. With socurity issues their Al has another issue that is their is no strict or proper Jules and low for using Al technology due to which many People (courtes) fake profiles on Social media and decieve innocent people. For example Forcebook has 3.03 billion detive users but the most profile on facebook core with woong information. Their mos no onle for counting profile even a child can also create Profile with wrong infortation Some people con coente multiple

multiple accounts on facebook So, Al has doamaligally imposered our world but it has some bard effect such ors Al course unemployment because Robots can work better then human in different sectors Pue to Al their is a Significent Homsformation in bussiness education, marchets, health contexs and in govt sector Al work better than human and it has noustness benifits if implemed day to day in life by making wook forster and ensied But it replaced by human and create a major Pooblem that is unemployment theres with the Passage of time Al technology improved but it has a negative Side. The most countries do a huge investment on woong use of Al technology. They Wants only advance

Date:...../20...... technology which have no benitioned for them and for humanity. Some invest on Al technology haxm their enemy contray They steal their important dada for their own beniets. Intellectual is a main issue of technology. People coentes their disigns, legges and artistic coentions but some people steal These idea of coentes duplicate things that can harm individual and business. Their should be a registered trade mark or copy sight that no body stead intellectual data. Education present day also depend technology, Children depend for making assignment instead of using books. Horbit cf learning books use becoming slew. In the most institution

Date:...../20.... technology we used for learning purpose instead Their are Solutions. That may overcome the misuse of Astificial intelligence First of machine can do multiple task at same time and performed better than hyman. At machine can solve many problems as humain do Al machines con't do Joiny mistarke or humain For example Al can use in health sectors to diagonized diseases. So Al can help human If it used in positive Secondly, Their Should take some pecossary steg Secure dosta It is crucial Keep your device up to date with latest security Avoid showing personal information on social

media and make suce to use storing and inque personals for your accounts. This a good idea to coende privacy setting an your section accounts and only share information with people you towst.
