7. Conclusion **Good**

Restrictions of girls and demands from boys pull both of them ~~inwards~~ ~~damages~~. Nonetheless these two harmful discipline discourage their potential to ~~be~~ strive freely. It results in socio-economic backwardness. The illiterate of the 21st Century will not be those who can not write or read, but those who can not learn, unlearn, and relearn." (Alvin Toffler,

The Third Wave, 1980). This means that the world needs to unlearn that women are less capable than men in any field. Similarly, they need to relearn that women are equally needed to make society more productive socio-economically.

But contrary to this, presently girls and boys are being treated unequally where boys in general are required to act as providers whereas girls are restricted by the virtue of obedience ideologically. Furthermore, girls ~~are~~ often chose for soft jobs.

whereas boys are demanded to perform harder jobs. As a result of it → wide inequalities surface in societies leading towards stunted growth and development. In this regard gender roles are to be more equalized by breaking the cycle of demands and restrictions.
