Precis 2023:

Importance of Education

According to psychological theory, there are two three types of thought about education freedom. Firstly, children should be independent; second is under the control and last about freedom and control both.

who under control of what???

In fact, freedom of children is good which is helpful in development. One group thought that education do not play role in growth, which is false. We live in a society with huge population for which required the cooperation. The cooperation did not build upon the spontaneous natural process of development, for this the education and science techniques are required for cooperation and build a strong society in small area with huge population.
