

My Journey with online learning during the
Pandemic:

⇒ During Pandemic, all world was **affected**, **especially** ~~mostly~~, underdeveloped **countries** which **are** ~~based~~ dependent on ~~such~~ agriculture sector. **Businesses and industries were closed** ~~business, industrial etc~~ was **stopped**. More people **were** unemployed. **especially** education system was very affected. The government **put** putted one year lockdown as well as people ~~lossed~~ life.

In covid-19, all world faced critical situation. During Pandemic, my education journey was not good. Universities, colleges only **completed** complete formality. Suddenly, this institution started online classes. **students did not** it **waves** was not good for students. The students ~~can~~ not understand **undertand** online classes and backward area students was big issues of internet. **Teachers** and students **were** ~~not~~ unaware about technological system. In covid-19 learning was not concept only struggled for complete formality. ~~but~~ because they donnot understand it. Even more students not taken classes due to unaware online system and some network issue. So, the government ~~should~~ should that first of all given training about online system. A big issue was teachers give assignment to students.

Some students misbehave from teachers. Education as well as economy system was more affected due to unemployment. when reproduction was less so automatically economy system was less. Economy and education are ~~very~~ ~~more~~ interlinked. So, the education system was not good in pandemic. Resulted, ~~my~~ my journey with online learning during the pandemic.

"The most complete gift of God is a life based on knowledge"

Poor grammar and spelling. Improvement needed
