

Climate change as an eyewash by Global North

Outline

1- Introduction

Thesis statement: In the contemporary age climate change has become an eyewash by the Global North. Net zero myth, major contribution to GHGs, and inefficient zero carbon policies etc are few among evidences. However, some proactive strategies will curb threats of climate change for sustainable future.

2- A glance at the contemporary age of climate change

3- Factors that prove climate change as an eyewash by global North

- a) Net zero myth by the Global North
- b) Major emitters of green house gases (GHGs)
- c) Inefficiency of zero carbon policies
- d) Reliance on fossil fuels for energy generation
- e) Weak and poor financial commitments on climate resilience
- f) Frequent change in global political environment
- g) Unprecedented shift towards nuclear world
- h) Generation of massive autonomous weapons
- i) Poor role in JCPOA threatening natural environment

4- Implications of climate change on the international community

- Rise of climate catastrophe in the world
- ~~Exploitation of environment~~ ~~Devastation~~ in developing countries
- Severe food insecurity and water scarcity
- Global health challenges threatening health

5- Methodologies to curb climate change as an eyewash by Global North

- Engage in diplomatic efforts on climate policies
- Strengthen role at the international forum on climate
- Strict implementation of financial commitment for sustainable environment
- Launch of successful clean energy projects globally

6- Conclusion

Net zero myth by the Global North

Undoubtedly, climate change is an eyewash by the Global North, and net zero myth is a major evidence of it. The Global North is a main driver of net zero myth on climate resilience. As a consequence, the climate change has become a serious threat, mainly prevailed by Global North countries. "Trump Administration exploited net zero purpose of global climate resilience which contributed to global rise of temperature at about 1.09°C in 2023." (M. Jaleera, 2023). This serves as a clear demonstration of net zero myth initiated by Global North, which highlights an eyewash
