d). States Cooperation

6. Conclusion

Introduction
Climate Change, the greatest threat of the modern age, has adversely affected the rights of human all over the world. Climate change refers to the long-term change in the temperature and weather patterns, primarily due to the emission of greenhouse gases (GHGs) in the atmosphere. On the other hand, human rights refers to the right of people to be equally treated in all aspects of life. Whereas, the implications of climate change on human rights are far-reaching including the right to water, housing and life. Despite of the life-threatening effects, efficient policy measures, such as climate justice, recognition of human right obligations, reinforcing the Paris Agreement and States Cooperation can significantly reduce the impacts. In short, climate change is a great challenge to the rights of people around the world.
