Education: Liberty And Responsibility

Three thoughts prevail when it comes to freedom in education. But the majorities, like Rousseau believe in the third thought which is, liberty is important for the children to be upright. Children cannot be virtuous on their own. The author is a critic of the idea of education having no positive impact. And it should provide a healthy environment for growth. In today's world, communities require cooperation to get the job done. If children's desires are left unchecked then it is less likely to achieve kindness, self-control and trained intelligence. They cannot obtain mental and moral values rather education must help them in achieving these.

No. of words in actual passage = 311

No. of words in the Precis = 105

Punctuation:-

Unfortunately, we often miss a basic school lesson. Every big task consists of several small ones, done precisely and perfectly. As a nation, we acutely need to learn the art of breaking down our moonlit goals into small accomplishable ~~goals~~ tasks. It will reduce frustration, anxiety, depression in society and embarrassment for the government machinery too, as they don't have to defend their unkept promises.

Translation:-

Every era brings many situations which nobody likes but has to accept. Sometimes, nature tests us by putting something in front of us to which we do not ~~like~~ have to do anything but still we have to make it part of our lives. It is happening nowadays too. Every century brings changes which are new as

compared to the previous ones. Success of natural science and arts has given a man a lot and that can be said to be a waste of knowledge and economical processes. Nature gives us fruits to eat but tells us to dispose its peels too. If that does not happen then the environment gets polluted.
