Q. no. 01

1. C India
2. C Viet Nam
3. D Pak
4. D None
5. B Wang Yi

Q. no. 02

Introduction:

Palestine - Israel conflict is a long-standing issue between the muslims and the Jews. Since the formation of Israel there were a series of conflicts and peace resolutions. But all are in vain. Now this issue is in a high swing after the Hamas attack on Israel. Recently Israel has started its genocide of the Palestinians. Despite certain rulings of the ICC, UN and UN there is not any stop in the war. Israel is not paying heed on all the rulings of resolutions and carrying out his full scale war. This war is still going on.

Reasons of start of Dispute between Palestine and Israel:

1. Territorial Issue - UN plan of Division

As the Britain failed to rule the Palestine then it went to UN. UN in 1947 devised a plan of partition of Palestine between the Palestinian people and the Jews. According to plan 56% of land were given to Israel and 44% to the Palestine. Palestinians started protesting and there was a environment of uprising.

2. Israeli Illegal Settlements:

As Israel has got 56% of land more than the Palestinians and started settling illegal Jews. According to a report.

To escalate internal conflicts Israel is settling Jews mainly in the West Bank which occupies over 20% of land.

So, the settlements have started occupying the homes of the Palestinians and not only this they are reports of the gun attacks on the Palestinians.

3. A Political Gap Between Fatah and Hamas:

Fatah ruled the West Bank and Hamas ruled the Gaza. There are many evidences of internal conflicts between them. Fatah holds relatively a soft corner for Israel than Hamas. That's why there is a conflict between them.

According to Reports:

Israel funding to Fatah accounts around 2 billion in deadly weapons.

Israel is taking this advantage and exploiting the relations of both so that there is not any political party to rule.

4. Hamas Attack:

On October 7, 2023 Hamas has attacked Israel from land, air, killing around 1000 Israelis and also hostages. As a counter attack Israel has launched a full scale invasion in Palestine killing more than 40k Palestinians including the women, children. Almost all of the infrastructure collapsed.

According to UNRWA:

almost all the Palestinians have been displaced.

Reasons of Not Settling this Dispute yet:

1. Hamas has not totally eliminated:

As a result of October 7 attack the Israel has killed many Hamas leaders and its soldiers. Most prominent was the killing of the family members of Hamas chief Ismael Hanich. Still peace not stopped. As Benjamin Netanyahu once stated:

The war will continue in every corner of Palestine till all of its members, soldiers, chiefs have not been killed.

To pursue his goal Netanyahu even attacked the Rafah and the war is going on.

2. US has been Repeatedly Supplying Weapons:

Since the start of war US has been supplying weapons to Israel. Recently there are reports.

US has approved \$61 billion military package of Israel.

Moreover, US is also supplying \$3 billion annually. Also the tanks and jets from the Germany and France have continued to war.

3. Repeated failure of peace negotiations in Doha.

Since the beginning of war, Egypt, Jordan are trying to bring the two sides and bring them one table. But still there is not any advancement to the peaceful resolution of conflict. On the issue of hostages, Hamas is not taking the soft stance and in the issue of Palestinian prisoners Israel is not taking soft stance - so the peace process is in standstill.

President Biden's 3 phase peace plan has also failed.

4. Failure of implementation of UN, GCT and DCI Rulings.

As the war started there are 4 resolutions come to the UN for resolving the conflict. US has vetoed 3 and the last one was passed because of US abstention. The PM Netanyahu has said that the UN has supporting terrorists.

And refused to accept it. However, the GCT ruling of cessation of war and DCI ruling on the arrest of Israeli PFLN and the defense chief all are in vain.

Requirements to Resolve the Conflict:

1. Implement the Rulings of UN, OSCE and GCC.

Israel-Palestine can be resolved by implementing the rulings of UN, OSCE and GCC in true spirit. Recently in the legal request of South Africa to the OSCE and GCC stated that

There is a complete ceasefire - binding the Israel.

And the UN resolutions on the implementation of ceasefire and ensure the supply of basic necessities. GCC issued arrest warrants for the Israeli Defence Chief and PM. All sought no fruit.

2. Implement Two state Solution - Oslo Accords

There is a requirement of implementing two-state solution to result of the unperfected Oslo accords formed the basis of recognition of PLO and Israel but not implemented in full spirit. Recently some European countries like France, Spain have formally recognized Israeli states. The last stressed on the point:

The lasting solution for this

conflict is two-state solution
So, implement it now.

Now, 147 out of 193 UN member states have recognized Palestine. Thus there would develop a diplomatic pressure on Israel to stop this genocide.

3. Development of a sole Representative Party of Palestine

There is a requirement of development of a political party which at a sole representative of Palestinians. This will help Palestinians to raise their voices in every platform. As this concept was sketched by the 1948 Defence chief.

War is not a solution but to develop a political party.

4. Muslim Countries Should Cut Diplomatic Ties With Israel and Put Pressure.

Prominent Muslim countries have still not taken any concrete steps to compel Israel to stop genocide. They even not cut diplomatic ties with Israel like UAE. RSA has only issued verbal statements and playing a hypocrite role. Stepping US to give India nuclear weapons in return to recognize Israel. So there is a need of collective voice.

Conclusion:

Despite Palestine - Israel conflict is a long-standing issue and increasing its intensity after the October 07 attacks and due to the various reasons, the war has not ended yet. These reasons include Hamas' underlying ideology, constant US support, failure of international organisations and lack of deadlock on peace talks. This conflict can be resolved through the implementation of two-state solution; implementation of rulings of UN, OIC and ICC and finally raising diplomatic pressure from Arab states.

Q. NO. 04

Introduction:

Pakistan has brought certain changes in its foreign policy since independence like since independence Pakistan's foreign policy was Indo-centric and leaned toward some countries. As the time goes Pakistan has brought certain changes like security centric and now economic centric. But due to the changes in the global order, regional dynamics and to secure its national interest Pakistan requires a balanced foreign policy rather than independent one. In this context we will highlight the determinants of foreign policy.

Determinants of a Balanced Foreign Policy:

Determinants can be divided into four categories each playing a vital role in a balanced foreign policy.

A. Internal Determinants.

1. History:

History is an important internal determinant which determine the relations with other based on the history. There are certain

countries with which the relations of Pakistan are historically good and vice versa. For instance relation with India are historically worse since independence but the relations of Pakistan with Turkey and KSA are historically good. So based on this dynamical factor Pakistan should try to adopt a balanced foreign policy.

2. Geography:

The geography of a state is a pragmatic factor determining the foreign policy. Geographically Pakistan either have a bad position or is bad. Because there are two hostile neighbours and two friends. So to reap a maximum benefit from these neighbours Pakistan should adopt a balanced foreign policy. Like India, Pakistan should have to develop diplomatic ties and funds with India.

3. Population:

Population is a changing factor for countries to confront. Some countries population proved a skilled labour like China and some proved a major market of consumers like. But unfortunately Pakistan has neither produced a skilled labour nor a

major domestic market of consumers. So in order to reap benefits from a skilled labour should encourage the youth to learn skills and to reach out to a biggest domestic consumer market should adopt a balanced approach to India.

4. Local Ideology and Leadership

Ideology is a leading factor determining the goals of a nation and ultimately the foreign policy. Pakistan came into being with an ideology of two-nation theory and still this perception occurs so that we are lacking in a balanced relations with our neighbours. Ideology determines the course of nations like President of Turkey wanted to regain the Ottoman Empire like said M. T. Patriot.

B. External Determinants of Foreign Policy:

1. International Law:

International law is an important foreign policy determinant. Pakistan should have to adopt a balanced approach so that the relations with the core countries will be good. If the relations with these PSC members are good - who determine the world order then culturally, economically,

and militarily Pakistan will not benefit if its foreign policy is not aligned with the international law then it face sanctions like Sanctions.

2- Reaction of state :

Reaction of state is helpful in every difficult situation. If the foreign policy of Pakistan is aligned with the interests of other nations then it will prove beneficial. But this is not the case for Pakistan. Because of this issue Pakistan still not become able to gather much of the international support. Likewise is the case of Palestine.

3. World Public Opinion :

World Public opinion is the deciding factor to judge the relations with other countries. Because of Pakistan's good public opinion in China, India, Germany have proved all weather friends. But owing to a negative public opinion in west Pakistan is still not able to root out the menace of terrorism from Pakistan.

4. Non-state Actors :

Non state actors is a major deciding factors to build the relations with other countries. It includes multinational corporations, Daji

top currencies, proxies (violent non-state actors). These violent non state actors are a major hurdle in developing good relations with Afghanistan. In addition to this the multi-national corporations decide and effect the trade and economy. So to get maximum benefit on all fronts Pakistan should have to adopt a balanced foreign policy.

Conclusion:

To conclude, all the internal and external determinants of foreign policy demands a balanced approach. This will help Pakistan to become diplomatically, militarily and economically a strong country. So, we hope that with the change of world order, regional dynamics and geostrategic position Pakistan will adopt a balanced foreign policy.
