- 4.2 Exploitation of workers by global supply chains
- 4.3 Surveillance and privacy erosion
- 4.4 Political repression; prioritizing economic interests over human rights.
- 4.5 Discrimination and xenophobia fueled against marginalized groups.

## 5. Conclusion

## Decoding the Topic

Artificial Intelligence and Governance: Navigating the future of Policy.

### Outline:

#### 1. Introduction

1.1 Hook

1.2 Background Information

1.3 Thesis statement: Since the advent of artificial intelligence it has commonly said that it will pose a threat to humanity. So its regulation is necessary and firstly carried out by the European Union. This regulation of artificial intelligence will pave the way to other other countries to make its future policy and regulate it.

## Need to Regulate the Artificial Intelligence

### 2. Threats posed by Artificial Intelligence which pave the way to Regulation

2.1 Deep fake videos; stealing one's identity

2.2 Loss of skilled jobs; programming, video editing etc.

2.3 Lack of transparency; particularly in deep learning models.

2.4 Increase in security risks; associated with its use.

2.5 Vulnerability to risks

2.6 Disinformation and threat to democracy

### 3. Regulation Adopted by the European Union and other Countries

3.1 Risk elimination report by European parliament

3.2 China released the "New Generation AI Development Plan" for AI development.

3.3 Japan has adopted a "Soft Law" approach to regulate AI

3.4 US companies plan to regulate the AI

3.5 UN also announced to form a advisory body to look AI.

### ~~4. Future~~ of Policy and Regulation

#### 4. Conclusion

## The Essay

Asimov has rightly said that "The science in the service of humanity is technology but lack of wisdom may make the service harmful". As rightly pointed out by Asimov one can take benefit from the technology if it has wisdom and ability to logically think and respond. Otherwise it will prove fatal for the humanity. Globalization is based on the technology and if the technology can be used for the progress of human rights, if it is negatively used then it will pose serious setbacks to the human rights. The major progress of human rights is that the globalization has proved helpful in spreading awareness, establishing international human rights standards, empowering marginalized groups, granting civil society mobilization and improved access to healthcare and education. However, human rights have seen major setbacks under globalization which are increase in income inequality, exploitation of workers, surveillance and privacy erosion, political repression and discrimination and xenophobia against marginalized groups.
