3.3.1 Lack of economic and technical progress

3.3.2 Inefficiency in agricultural / industrial output due to conventional labor force

3.3.3 Increment in illiteracy, causing corruption and theft.

3. Conclusion.

Brain drain: Causes and Consequences.

The pursuit of a better standard of living is reason enough to leave a country which does not care enough to even provide basic necessities to its assets. Brain drain, the emigration of highly skilled and educated individuals from one country to another is a common phenomenon in today's world. There are several causes ranging from political instability, to lack of incentives to discrimination to higher living standard abroad. This results in lack of economic growth, loss in tax revenues, and shortage of human capital / skills. If the root causes are not identified to the full extent and the consequences not mitigated, it could leave drastic adverse effects in long and short term both to the development of a country. Unfortunately, Pakistan is also one of those countries affected.
