

Rise of India - A new threat for Pakistan

(I) Introduction

Thesis Statement: India is an emerging state in the South Asia; however, its growing pace is a threat to Pakistan politically, socially, economically and democratically.

(II) Pakistan and India - Under the Clash for a long period: A brief view

(III) The certain indicators to portray India as a rising state

a) Emerging in realms of economic model: open economy

Case in point:

1990 economic model

of the ex PM - Manmohan Singh.

(b) Participating in the distinct economic and security blocs

Case in point:

BRICS and QUAD

(c) Coherent decision making

fabric with a broad consensus in its country.

Case in point:

→ Kashmir decision

→ Foreign policy

(d) Adequate budget expending on the nuclear warheads

Case in point

2 billion dollars: GDP (2)

(iv) How the rise of India is a threat to Pakistan's integrity

(a) The constant growth in the international market in terms of economy

Case in point

Investing in Central Asian Countries.

(b) Aggrandizing the nuclear weapons and advancement in the warheads.

Case in point

Stockholm Report 2024

(c) Leading member of the developed blocs for dominating

Case in point

SCO and SAARC organization

(d) Signing the pact and agreement with the OSA on the nuclear deal: energy

Case in point

Indo-Pacific agreement

(e) Holding the global world

Order in order to

bring down Pakistan and

its alliance from growth

Case in point

G7, Observer member,

(f) Investing in the muslim states to curtail the market of Pakistan.

Case in point.

→ Central Asian States

→ Chabahar project: Iran.

(g) Sustaining the democratic values and absolute testimony of the parliamentary power
Case in point

Unity on the decision of revoking 30A - 370 article of Kashmir

(h) Violating the international treaties and resolution, but remains the dominant on the world fabric of the order
Case in point

Water basin treaty
Caspian territory.

(i) Sponsoring the terrorist and separatist groups and outfits.

Case in point -
BLA and TTP

(j) Labeling Pakistan at the international arena as a terrorist state

Case in point
Dis-Info Lab
Kalbushan Yachor.

(K) Challenging the demographic
Statistic of Kashmir and
turning down to pursue
the demand of the
International Community.

Case in Point

(UNO Resolution 1948)

QD

Conclusion.

After the wiping out the 2nd world war, the concept of the competition between two states has been strategically persisting in the global world arena. However, at early epoch of history, the two ideologies had been competing each other such as the Capitalist and Communist ideologies between the USA and USSR as well; Similarly, the same fabric transferred to the newly independent countries: Pakistan and India. Both states took starting the wars which have been waged so far on the different perspectives. Nevertheless, in this competition, India has crossed Pakistan in terms of economy and ~~part~~ democracy. To add to that, India is the third world emerging economy and has constantly expending on the modernization of nuclear warheads. Not only this, but

It is playing the crucial role in the world economic blocs such as BRICS and SCO. Further, India has its dominant leverage on the South Asia and its countries. It is constantly investing in Iran's port and Afghanistan as well. India is an absolute threat to Pakistan's integrity and sovereignty. Similarly, having the UNO resolution and international unease over the Kashmir dispute, India, without taking into consideration of Pakistan, ~~he~~ revoked the special status of Kashmir region. Thus, India ~~and~~, growing ^{and} holding hegemonic power, is directly demonstrating the dignity of Pakistan.

To start with, historically, Pakistan and India have remained the biggest rivalry and are rampantly going to the worst. However, since the inception

of Pakistan and India, both states have waged the four direct wars. Along with that, many internal and external attacks have been launched by both sides. Hence, due to the past background of the colossal clashes and conflicts, ^{India} has taken the commencement towards growing.

To bring the fact into consideration, India has been emerging in realms of economy: Historically, from 1947 to 1990, India had been pursuing the middle economic model which was known as Gandhian and Nehruvian economic model, but after seeing the world economic order, India brought the economic reforms in 1991 under Prime Minister of Manmohan Singh. He ~~took~~ started taking the liberal economic model. Thus, due to the economic,

alteration, Indian is famous for today's economic power in ~~the~~ ^{21st-} the 21st-century.

Besides, In the era of multipolarity, having seen this cogent opportunity, India is openly participating in the distinct economic and security blocs. However, in the modern time, the alliance and cooperation is the leading factor to uphold the presence in the international politics. Like wise, keeping in view, India is recently joining the BRICS and QAD groups. Through these organizations and groups, India has been strengthening its role in the world.

Indeed, cogent decision making fabric with a broad consensus in its country is another sign of growing

India. To add to that, Prime minister Narendra Modi, knowing India dictator, leaves no stone unturned in procuring the consensus from the parliamentary to get passed any bill. Nevertheless due to the broad participation of the parliamentarian, Indian government got resolution passed from parliament, in which Kashmir Status through constitution under articles 35(A) and 370 was revoked.

First, India has directly been modernizing its nuclear warheads by expanding the adequate budget. According to the Stockholm Convention, India has spent 2 billion dollars on its defence and aggrandized its nuclear warheads as compared to Pakistan. Mostly, India pays its thorough heed on modernizing

global weapons, as it can defeat its rivals.

Second, India is subtly growing in the international markets in terms of economy.

However, India is an absolute threat to Pakistan through emerging market of Indians in the Central Asian Countries. The Central Asian Countries are the huge market for the global actors, especially Pakistan, China and India. Therefore, Pakistan is ^{not keen} on allowing India to impede the door of economy for Pakistan.

Third, India boasts up its modern weapons and nuclear energy which is externally and internally damaging Pakistan. In the past experience, ~~the~~ both countries were at brink for in front

nuclear weapon was after the attack on the Indian parliament. Likewise, keeping these unexpected happening, India has been heeding the intention to expand the nuclear weapons. Therefore, this is the grave imbroglio for Pakistan.

Fourth, India hosts the powerful blocs, such as BRICS and SCO. Through which India creates obstruction for Pakistan not to join these blocs as if it grows more than that of Indian economy. For instance, there is the obvious example of the South Asian Association regional corporation (SAR) where India leaves no stone unturned in creating hurdles for growth of Pakistan.

Fifth, The OSA and India nuclear agreement is another

unease for Pakistan. In 2021, India and the USA signed the nuclear energy deal in which it had been formulated that India would be allowed to buy the civil nuclear energy for the purpose of civil needs. Ergo, India is obtaining the chance which poses against Pakistan.

Furthermore, holding the global order in order to bring down the dignity of Pakistan and its alliance, naming China is a priority of India. A few days ago, the most powerful world conference was stretched in Italy. The G7 countries invited India as an observer state. Nonetheless, this sign is enough to show Pakistan that a rise of India is a horrific

threat to Pakistan.

Equally important, India is keen on investing in the muslim countries to build up drawbacks for the economy of Pakistan. In 2020 and 2021, India ~~has~~ started initiating the investment in Iran and central eastern countries. This purpose of India is crystal and clear to demoralize Pakistan economically. Furthermore, India invested in Afghanistan, as it could formulate the route to eastern states which are landlock countries.

Moreover, India sustains the democratic values and absolute legitimacy of the parliamentary authority. Having seen the absolute authority of parliamentary decision, the

Prime minister of India suspended the status of Kashmir with the majority votes. This decision is ~~completely~~ ^{completely} violating the International Law and United Nations' resolutions. However, despite having done this illegal action, not a single world leader condemned it. Ergo, this is a threat to Pakistan.

Additionally, violating international treaties and resolution, India still remains the powerful entity in the global fabric. This is an inevitable danger for Pakistan. However, India does not care about any agreement which was signed in the past with Pakistan, such as Indus basin water treaty and Kashmir resolution. Because of the growing economy,

its leverage prevails in the international community.

Therefore, rightly said, "might is right, not a right is might" Hans Morgenthau.

In addition to that, due to rise of India, the wave of terrorism in Pakistan is sharpening ~~by~~ stepping up. India sponsors the terrorist activities in Pakistan and ~~finances~~ ^{transfers} the funds to terrorist group for subverting Pakistan. The widely fresh example of Indian RAW Captain, Kabbush Gadhon, was arrested in Balochistan and he is still in Pakistan and has been awarded life imprisonment. Then, TLP and BJA are being funded by the RAW.

Indeed, India, being a rising state, it portrays Pakistan as the terrorist countries. It happens

mostly in the election time of India. Recently, Dis-information-Lab started campaigning against Pakistan by funding of India because it has dominancy over the global order. All in all, India is the dangerous opponent to Pakistan.

Indeed, India has challenged the dignity and so called power of the international community to change the demography of the Kashmiri people. It has drastically turned down the demand of Pakistan for self-determination of the Kashmir region. No body can go against the worst stance of India because India has the supreme power in terms of ~~es~~ economy, military and foreign relations. As a

India is out of reach
for Pakistan now.

In conclusion, there is no denying the fact that India is going to be a part of those power states that change the global order. It is being the third emerging economy in the world. To add to that, India's rise is the huge threat to the integrity and sovereignty of Pakistan & in realms of the economy, Kashmir issue, reapproachment peace and prosperity. Not only this, but also India has also crossed Pakistan in the numbers of the economy and nuclear war heads as well. In the international arena, the leverage of India exists and whatever India decides
