

Expanding AI is Expanding Dehumanization

Outline

1. Introduction

2. Defining The concept of dehumanization

3. How expanding Artificial intelligence lead to the expansion of dehumanization?

a) Continuous replacement of blue and white collar workers

b) Erosion of privacy through increased monitoring of individuals in public and private sectors!

c) Lack of empathy and understanding through depersonalized interactions.

d) Delegation of life-and-death decision automoman weapons lead to dehumanization on The battlefields!

e) Elimination of human through process from every day decision, turning individuals dependent on AI.

f) Cost effectiveness of machines appears more lucrative than upholding human presence.

g) Massive surveillance and data collection is competing human.

4. Reason behind AI getting room to vastly dehumanize whole fields:

a) Role of profit driven approach in adoption of AI technologies without sufficient consideration of their impacts on society.

b) Absence of sufficient checks and balances on AI.

c) Lack of public awareness can lead to passive acceptance of AI applications without critical scrutiny.

5. Conclusion
