

Agriculture sector is the back bone of Pakistan economy. Because of its contribution in GDP and it account for half of employment of labour force. Statistically it provide about 24 percent push to the GDP and also the largest source of foreign exchange reserve. Despite its 24 percent contribution in GDP, there are so many issue in agriculture sector. Such as the lack of using technology, unavailability of uneducated labour force, lack of research, and ~~many~~ many more. However, these issue exist because of the lack of financial resources, and some other technical factors. moreover, there is also

agriculture sector. Such as the lack of using technology, unavailability of uneducated labour force, lack of research, and ~~many~~ many more. However, these issue exist because of the lack of financial resources, and some other technical factors. moreover, there is also issue in water management. According to the study of international water management institute that Pakistan can save up to 12.5 ~~acre~~ million acre water annually by adopting modern agriculture techniques such as small irrigation system.
