

Q#1 The Defect of civilization.

Instead of making machines our servants, they have become our master" the writer said this because, we had grown so dependent on them, that they are like our masters, we spend time looking forward to end waiting for them. & they being stem meter, must be fed with coal, oil and petrol, and if not given they grow sulky & refuse to work. or even burst or blow up with rage. So we have to wait for them & keep them in good temper.

Q#2

All the time the machine have served for us or new energy they give to us. we spent most of its part to make more and better machines. and this is curse because we instead of focusing on our civilization and consolidating it, we waste it on yet another machine. that are just aid of our civilization.

Q#3.

Civilization means "A state of human society that has developed norms, culture, Government and industry."

Author's view of civilization. is making & linking beautiful things, and thinking freely, living rightly & maintaining justice equally between men & men. and I agree with the Author's view as through these practices only a civilization can be antiseptical and glorified.

Q#4

From the idea of "Making more beautiful thing":
The author's want to say to promote high norms in the civilization. like thinking freely, living rightly & maintaining justice between people.

The beautiful thing I want to make is promoting equality, freedom of speech, setting rule of law and promote our cultural heritage. and I'll do this by becoming the part of administrative institution of our country and focusing on such subjects that are under the pile of unnecessary task and are very important for our country.

Q#4.

In my planning to prevent poverty, the one's who receive my most attention would be. children's, women's and unemployed youth. who are looking forward for job opportunities. because they are ~~the most part of our~~ more than half of our population and ironically the most ignored ones.

So ill try to focus on problems that hinder their path of success and ultimately the success of world. I will first start with promoting education, An illiteracy rate of Pakistan is 52% and more than 2 million children are out of school, then promoting equal right and gender discrimination. Because women are the major part of our country, then by focusing in betterment of infrastructure development to enhance job opportunities. I will also work to consolidate the law and order situation in Pakistan & make sure the equal access to justice to all the people of Pakistan.

Step-1 (Core Point of Every Sentence in your own Language)

Title:-

Palestine's Perspective : From the eyes of
"Nazir Hassan"

Nazir Hassan, was born and brought up in
Mashhad. He studied Anthropology & started
working on T.V & then turned to cinema.

In 1999, in his film 'Independence', he criticises
Israeli's notion of independence that basically
is invasion.

Admit the news about Israel's planning to
annex another territory of Palestine, I received
an e-mail from Nazir Hassan. He wrote
about his new film "My Grandfather's Path"
& attached its link. They say choose your
enemies wisely as you would end up like
them, focus on your highest dreams.

His new documentary did a great job in
putting forward Palestine's perspective - a epic
ode to his homeland. A shorter version of

Step-2 (Reorganization of the points of step-1)

'My Grand father's path' has been broadcasted by Al-Jazeera & must be watched in one go.

Possible Outline / Titles:-

- 1) The misdirected use of energy brings more harm.
- 2) No work is better than Bad work.
- 3) You gain more by quality work than quantitative work

Precis:-

The Devil is the most busiest creature in the universe and he hates laziness and waste of time. But according to author the world we are living in suffers less due to laziness but more due to misdirected use of energy world was a happy place before than now, when people were not busy. Even now if statesmen and politicians refrain from being always busy in controversies. then there would be more peace in the world and people gain more from it.
