 - Living standards minimized
 - Inflation & Poverty
 - Irresponsible manpower.

CONCLUSION

- Concluding Statement
- Thoughts & Opinion.

The Essay

Chinmayananda, a hindu spiritual leader, said, "The youth is not useless they are used less, they are not careless they are cared about less." More than 800,000 Pakistanis, majority youth, left the country in the previous two years - almost thrice the value in 2021, according to the Pakistan's Bureau of Emigration and Overseas Employment data. Brain drain is neither a new issue nor is it sent from the heavens. Developed countries have gone through this as well but they have dealt with it rather successfully. Therefore, the developing countries find it themselves toiling with it. Unfortunately, Pakistan is one of them. The causes are not new in nature but unless these causes are addressed properly this issue is not solving on its own. The causes are the major reasons of why people are leaving: Unemployment, Political Instability, Lacking education system and for a better life. The Consequences of the brain drain happen to be a decline in revenues, loss of expertise, deteriorated system and infrastructure, eventually Lack of motivation and nationalism. Hence, the aim of this essay is to discuss further in detail the causes and consequences of brain drain.
