

Title:
Artificial Intelligence: Transformative Force in the Modern World

Outline

A. Introduction

1. Emergence of Technology
2. AI: Transformative force
3. ~~Thesis Statement~~

plz write here thesis statement why keeping the reader fixed

B. How AI has Transforming the world:

1. Automation in industries:
combining AI algorithms with robotic systems
2. AI has altered the medical sectors;
a. Nanobots repairs cells
3. AI-driven tools to help tutors and students in education institutions
4. ~~Businesses uses AI in~~ accounting, customer service, and ~~cyber security~~ AI propelled latest businesses
5. AI in transportation improves traffic safety, real-time traffic updates and conditions.
6. The opportunities for women ~~is~~ expanded opportunities for women
increased in contemporary AI era
7. AI creates impacts in warfare;
a. ~~Israel uses AI in Gaza~~ AI and war in Gaza

8. Artificial intelligence in space mission : revolutionize space exploration
 - a. NASA's Mars rover mission
9. Courtrooms also using AI and its applications
 - a. Use of ChatGPT, by a Pakistan's judge
10. Artificial intelligence is transforming agriculture AI and controlling Disaster
11. ~~AI can be used in disaster prevention technology~~

C. Challenges Created by AI in this Modern World

is due to onslaught of AI

1. Job displacement ~~is created by AI~~
 - a. AI will replace 85 million jobs by 2050 : World Economic Forum
2. AI algorithm bias and transparency issues
3. misinformation created by AI
 - a. Deepfake application
4. Ethical and security challenges created by AI

D. Conclusion

Humans have been in a continuous state of revolution, from the crafting of hand axes in the Stone Age, to the invention of supercomputers in the Modern Era. However, many innovations come at a great cost. For instance, fire. It was a transformative force in the history of mankind; it creates a lot of opportunities but it comes with a fear that it will burn their houses. Similarly, in the modern world, the emergence of artificial intelligence has triggered a significant shift and impacts many fields such as education, medicine and businesses. However, it also has its potential negative impacts. AI is the transformative force in the world because it transforms the industries by automation, alter healthcare sector with advanced technology, and revolutionized the education sector with AI-driven tools. Moreover, in business AI has been used in accounting, customer care service, and cyber security. AI also improves transportation facilities. Similarly, AI also creates opportunities for women in the modern world. Likewise, AI creates a profound impact in warfare, space missions, and in courtrooms. AI also transforms agriculture and advance the disaster prevention technology. Although,

good use of idioms

emergence

perpetrated

AI has been playing pivotal role to upgrade the business

u are not diversifying any expression

emcompass a broad range of applications, it also created some challenges such as job displacement. AI algorithm bias and transparency issues are also a big challenge for user. Similarly, misinformation can easily be created by AI. Likewise, ethical and security challenges are set up by AI. Artificial intelligence has transformed the world with a notable transformations in education, industry, healthcare, warfare, and transportation. Similarly, it has created profound impacts in courtrooms and space missions. However, with these revolutions, it also creates some challenges.
